ARCHIE P. McKISHNIE

Printed by Special Arrangements with Thos. Allen, Toronto, Ont.

(Continued.)

"Watson?" questioned Paisley.

"Watson's likely comin' over today. Dad's got a letter from him."

Paisley crammed his hands in his pockets and shrugged his shoulders. "I scented trouble when the Colonel built this mill over on Totheside," he declared, "but there was no way of stoppin' him. It was his own land he built on; it's his own timber he's been sawin'. I understand he's layin' plans to get our timberland, and there ain't no tellin just what a man like him will do to gain his ends. But, Boy, we're here first — don't you forget that."

"I'm not forgetting it," returned Boy grimly.

"Say," said Bill, abruptly changing the conversation, "when is Gloss's birthday?"

The shadow left Boy's face and he looked up with a smile.

"Why, it'll soon be now," he answered; "she's nineteen next month."

"I didn't figger on lettin' you in on this,' grinned Paisley, "but I reckon you need cheerin' up. You know them silver-fox furs that Smythe offered me my own price for? Well, I'm not goin' to sell 'em to Smythe nor anybody else. They're for Gloss."

"For Gloss?" repeated the Boy, "— for Gloss?" Say, Bill, you can't afford to give them furs away—not even to Gloss."

"Me and Injun Noah are makin' her coat," chuckled the man. "Such a coat, Boy! No lady in this land has ever had such a coat before; never will have such a coat again. Silver-fox pelts at three hundred dollars apiece. Think of it, Boy! And there's six of 'em—four grays and two blacks. And the coat's to be lined with mink-skin, too—think of that!"

He took his friend by the arm and took him into the house. Boy liked Paisley's home; it was always so bright, so tidy, and so cheerful. The wide table of heavy oak with solid legs artistically carved standing in the center of the main room, the carved high-backed chairs fashioned by a master hand, the crude charcoal sketch of marsh and wood and water scenes on the whitewashed walls, gave him a sense of restfulness.

A great iron tea-kettle suspended over the fire of hickory logs was disgorging a cloud of steam that drifted to the rafters. Paisley came forth from an inner room carrying a huge platter piled high with fowl.

"Never seen the pa'tridge in better condition," he avowed. "I shot six last night and I've been feastin' ever since. Just pull up and devour, Boy, while I give old Joe some of his choice bones. I've been sayin' 'em up for him. I'll get you some of my special brew of tea soon's I wipe the reproach out of that setter's brown eyes."

Boy drew up to the table and fell to with an appetite such as only men of the woods possess.

Having attended to Joe's wants, Paisley placed a pot of fragrant tea at his guest's elbow, and leaning back in his chair with a smile of content, lit his well-seasoned clay pipe and smoked.

His eyes followed those of Boy, who was gazing on the smaller of two rifles hanging above the fireplace.

"You've often wondered why I never use the little gun," he remarked, drawing his chair forward and leaning upon the table, "and I've never told you. I'm goin' to tell you now. I won the rifle from a man down near Sandwich. He was a bad man all round, and up until I met him just about made the laws of his community. I happened along there one night, and bein' in no hurry, made up my mind to stay around for a time. The feller I speak of owned that rifle. He was a big chap, about five years older than me, and was supposed to be a fisherman. In reality he was a smuggler, and he was a slick one, and no mistake. When he wasn't smuggling he was gamblin' with the sailors and passengers of the lake boats. A poor little hunchbacked sister kept house for him, and he used to ill-treat her. Once I happened along and stopped him from strikin her with a whip. Of course, he always hated me after that. One afternoon there was a shootin'-match in the neighborhood, and he beat me shootin,"

Paisley sat back and smiled.

"Yes, he beat me shootin', Boy. Then he got boastin'; but I didn't say a word. He finally offered to bet his rifle against mine that he could beat me again. I didn't want more hard feelin's, but I simply had to be game. A man couldn't just take a dare in that wild country, so we had the match right there, and I won his rifle. He didn't say anythin' but he looked murder. I left the place soon after that, and about a year later I came along that way again. I heard then that the fisherman chap had cleared out to no one knew where, and left his sister sick and in want.

I went over to their shanty and found the little woman dyin'. She knew me and she seemed to want to tell me somethin'. But the end came before she could say it."

Paisley nodded toward the rifle.

"I've never shot that gun since, and I won't. I'd be ashamed to shoot a gun that belonged to a man who'd leave his crippled sister to starve."

"Did the sister know where her brother had gone?" asked Boy.

"No; or if she did she couldn't tell me."

"I'll see him — leave that to me," Boy pushed back his chair and rose from the table.

"I don't understand how any man could do such a thing, Bill. What was the feller's name?"

"His name was Watts, Jim Watts," answered Paisley, swinging the kettle off the fire. "I ain't thinkin' as I would know him again, now, even if I happened to run across him. This all happened sixteen years ago."

He followed Boy outside and the two walked over to an out-house standing in a grove of beeches.

"I haven't had much use for this fork since the wolves got poor old Mooley last winter," said Paisley. "Guess I'll be gettin' another milk-cow soon 'cause it's quite a bother havin' to go to Peeler's for my butter."

"I was goin' to ask you about Peeler," said Boy. "I wish, Bill, you'd see him and persuade him not to sell one stick of his timber to Hallibut or his agents. Jim's an easy-goin' sort, who might be led off quite easy, and it's up to us to see that he isn't." Paisley replied. "And I'll see the rest of the Bushwhackers, even old man Broadcrook and his sons, who haven't any particular use for me, somehow."

"I guess what the Broadcrooks do won't matter much," laughed Boy. "They hate everybody and everything it seems. I don't know why."

He picked up the fork and turned toward the path. A west wind had piled up a bank of long drab clouds above the wood. The wind was damp and from the distance came the dull boom of the waters beating upon the mucky shore of the bay.

A few yards down the path Boy halted.

"Say, Bill, dad was tellin' me 'bout the talk you had with the teacher. I wish you'd get better acquainted with him and make him see that his place isn't here."

"If he was half as smart as he thinks he'd see that it isn't," replied Paisley.

"And Bill," called Boy from the edge of the wood, "I guess Mary Ann knows a real man when she sees one. Keep askin' her till she says 'yes,' Bill."

As Boy found the creek path a gust of wind, damp with the spray of Rond Eau, smote against his face with biting force.

From across the creek came the jarring notes of the school bell.

Then the wind fell, and the clouds parted to let a misty web of warm sunlight through to the world.

(To be continued.)

"California Syrup of Figs"
Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

Danish Zone Returned

Schleswig Again Under Denmark's Sovereignty

The treaty returning the Danish zone in Schleswig to Danish sovereignty has been signed by the British, French, Italian and Japanese ambassadors and H. A. Bernhoft, Danish minister to France.

The population in the first, or northern plebiscite zone of Schleswig, voted in February last by an overwhelming majority to return to Danish sovereignty. In the second zone plebiscite in March, the people voted by a large majority to remain under German sovereignty.

A Copenhagen despatch of June 16 stated that the boundaries between Germany and Denmark, as fixed by the plebiscites had been definitely established by the international commission at Flensburg.

Erect Memorial to Colored Heroes

The first tablet erected in a parliament building in Canada in memory of Negroes was unveiled in the provincial parliament buildings, Toronto, by Premier E. C. Drury. The tablet commemorates the patriotism of 17 men who fell in the war while serving with No. 2 Construction battalion, the only colored battalion in the Dominion.

Back to the Land

Conditions Point to a Long Period Of Exceptional Opportunity On the Land

Several times this year despatches from Winnipeg have reported an exodus of office workers and other "white collar" breadwinners to farms. Officials of the National Railway declare that 60 percent of the settlers along their lines are book-keepers, craftsmen, shopkeepers, clerks, or other urban workers who find they cannot make ends meet in the city. This is a healthy and sensible movement, which is likely to be much extended in the next few years, for apparently it is on the land that the greatest individual profits are to be made. Urban industry was immensely expanded during the war, and when the shortage of commodities is further filled, is bound to experience some contraction, while the demand for foodstuffs is apparently unlimited.

The general conditions of distribution point to a long period of exceptional opportunity on the land. On the farm, housing is cheap. Food is obtained at half the city cost. More farmers have automobiles than city people. If the productive value of farming and a city salaried position be compared, it will probably be found that the net gain from farming at the end of the year is more than any possible saving from the salary. Exorbitant rentals and the high cost of "good appearances" grind the salaried man into economic nothingness. In the West, transference to a farm is not the upheaval it is in the East. The use of tractors and other machinery has revolutionized farming there. A big crop will make the beginner. About 25,000 western farmers spend their winters in California. The opportunity to accumulate a small fortune, with foodstuffs at present prices must be an ever-pressing lure to the small-salaried city office worker who sees himself getting nowhere.—Mail and Empire.

German Warships To be Broken Up

Other German Battleships Have Been Set Apart for Use as Breakwaters

Edinburg, Scotland.— The recent arrivals of various German battleships and other craft which are being handed over to the British authorities under the peace treaty conditions have created considerable interest in this district. One of the most interesting of these has been the former well-known commerce raider, the Moewe, which earned a great amount of notoriety during the war. This vessel recently arrived in Leith Roads, and is now to be handed over to a London firm in order to be specially fitted out for the fruit trade.

It will be recollected that the Moewe, which was only built during the war, performed some daring exploits during the early part of 1916. This famous raider captured the Appam, and on the succeeding day sank the Clan McTavish. In a two months' raiding cruise, and by adopting various disguises, the Moewe claimed to have captured or sunk no less than 15 vessels.

It has been announced that two of the German battleships which had recently been surrendered, namely the Baden and Helgoland, are to be sent to Portsmouth where they will be used as target ships. The Baden is a new super-dreadnought, plated with massive armor and embodies all the latest German ideas of gunfire protection. Used in the manner indicated, much valuable information will no doubt be obtained by our naval constructors as to the efficacy or otherwise of that type of armor.

It is also stated that other German battleships which have been allocated to Great Britain have been set apart for use, when filled with concrete, as breakwaters in the vicinity of Freshwater, Isle of Wight. In this region coast erosion has been very serious, and it is felt that these German vessels packed with concrete should make a very formidable barrier to the encroachment of the sea.

The former German destroyers V 80 and V 127, which were allocated to Japan, have, it is learnt, been handed over to the Granton Shipbreaking Company to be broken up; these vessels are at present moored in the West Harbor at Granton. The former German battleship Nassau, which has been moored for some considerable time near Burntisland, has left the Firth of Forth to be broken up elsewhere.

Cruiser is Oil Burner

Latest Type of War Vessel for Canada

Much satisfaction is felt in government circles over a cablegram received by Hon. C. C. Ballantyne, minister of naval service, that the cruiser to be presented by the Imperial government to Canada will be an oil burner of the latest type. The name of the cruiser has not yet been received.

The type of Cruiser available was discussed with Lord Jellicoe when the latter was here some months ago, and it is understood that Lord Jellicoe expressed doubt whether it would be possible, in view of the situation, to secure an oil-burner.

The cruiser and accompanying destroyer will probably reach Canada in September.

"Mounties" Active In Eastern Canada

Helping to Enforce Immigration Rules and Prevent Any Smuggling

Equipped with unromantic motor-cycles, members of the Royal Canadian Mounted Police, recently posted to their new stations in Eastern Canada, are gradually increasing their activities along the St. Clair border. Stringent enforcement of the immigration rules is being insisted upon, and all persons suspected of being guilty of breaches of the immigration or customs laws are brought before the authorities, and asked to explain. Reports of extensive smuggling of Chinese into the United States has resulted in the appointment of a force of special officers on the American side. The matter has become somewhat serious south of Port Huron and the Canadian authorities have been asked to cooperate. The result is that the number of Royal Canadian Mounted police here may be increased. The "Mounties" whether on horseback or motorcycles, adhere to the tradition of the service, that no matter where the trail may lead they always get their man.

Women Can Fortify Their Health

With constantly aching backs, weary, dragging-down pains, dizzy and nervous headaches, women have a hard burden to carry. It is wise for every woman to fortify herself against these derangements which are present when extra demands are made upon the system by Nature's laws. No better remedy exists for woman's peculiar ailments than DR. HAMILTON'S PILLS, which possess tonic properties that act upon the proper organs at the proper time. To prevent headache, to overcome dragging weariness, backache, nervousness and pallor — to look well, sleep well, eat well and enjoy the manifold blessings of sound, regular health, every girl and woman should regulate her system by Dr. Hamilton's Pills, 25c per box.

New British Record

Airplane Carried 3,690 pounds To A Height of 13,999 Feet

A new British record was recently established by a British aeroplane, fitted with two Napier Lion engines of 450 horsepower each. The flight lasted one hour and twenty minutes, and the record load of 3,690 pounds was carried. This load was made up of timber, ballast tanks with water and some special instruments, the weight being equivalent to a load of 26 passengers. The machine carried the pilot, Capt. G. T. R. Hill, and also a mechanic, and with this record weight on board it attained a height of 13,999 feet. No special preparations were made for this flight, only the chairs being removed from the passengers' saloon, where the tanks were placed, all such decoration as lamps, clocks, curtain, and mirror, remaining. The aeroplane, which has established this record for height, duration and useful load, is the one recently exhibited at the Paris Aircraft Exhibition, where it flew from London in the short time of one hour and 50 minutes.

Where Women Are Wanted

Emigration the Only Remedy to Equalize the Sexes in England

Walking down the Strand recently a newspaper reporter counted 300 women to fifty-eight men in the space of a quarter of an hour while the proportion in a tube carriage was 22 women to six men, says Pearson's Weekly.

As we are all aware, we have now an enormously greater number of women than men in these islands. Even before the war English women outnumbered English men by nearly a million. Today the difference is about two millions.

Some people declare that there is nothing to be done to remedy this state of affairs. Why not? There are heaps of countries which want women. Our own Dominions in particular. Take Western Australia. In that great country there are three men to two women. There is not a single Australian state where men do not outnumber women. For the whole of the island continent 200,000 women are required to make the sexes equal.

Matters are not quite so bad in Canada, but even there 130,000 women are required to even up matters. Smaller dependencies are in a worse way. The Falkland Islands, for instance, have 1,200 men to only 800 women. Trinidad has 136,000 men to 119,000 women.

British Guiana is short of women; so are the beautiful Seychelles Islands and as for Hong Kong, that great metropolis of the East, it has 3,000 men to 1,000 women.

The fact that in almost every part of the British Empire, except in Britain itself, there are more men than women. There is no other country in the world which has so great a preponderence of women as has England today. Surely emigration is the best indeed the only cure for the present state of affairs.

Two Good Reasons

Why the People of Canada Should Eat More Fish

Two good economical reasons why you should eat more fish:

It is cheap and nutritious, and provides a thrifty meal.

One of Canada's greatest sources of wealth is her fisheries, and you help develop the industry by eating fish, and also help to put Canada in a better financial position.

Probably you are not aware how little fish Canadian people use.

Great Britain is one of the greatest fish consuming countries in the world. During 1918 she had a per capita consumption of 58 pounds, and in 1919, it is believed, this was increased to 60 pounds. This means that each individual consumed at the rate of more than one pound per week.

In the United States last year it is estimated by officials at Washington the per capita consumption was 19 pounds. Although little reliance can be placed in this estimate, there is no doubt but that the local consumption in the United States has increased greatly in recent years.

A few years ago the per capita consumption in Canada per annum was a matter of ounces. Through the combined efforts of the Canada Food Board and the Fisheries branch it is estimated that the local consumption at one time reached a point equal to 45 pounds per capita. During 1919 it is estimated that the per capita consumption was somewhere between 23 and 25 pounds per annum.

Canada is one of the greatest, if not the greatest fish producing countries of the world. Why have our people so little faith in fish?

Germany and Britain

Feelings Toward England Have Entirely Altered Since the Armistice

When Germany has filled out her enfeebled body again, young Frenchmen will do well to set their affairs in order, for another war will be in sight. In that war the Germans hope that we shall not take part. They bitterly regret now that they ever forced a quarrel on us. They hope that we shall soon be friends again. This sounds extraordinary to us, but it is easy for Germans to entertain this hope, because they have no feeling of shame for anything that has happened, and they simply do not grasp the British attitude of mind on this subject. "It's all over now," they say genially. Their feelings toward England have entirely altered since the armistice. There is no hatred of Great Britain now; in its place there is a strong sentiment of grudging, envious admiration. But it is a base kind of admiration. Founded, moreover, on false conceptions. Germans admire us because they believe we have "wangled" everything our own way. They credit us with all their own self-seeking, their reckless disregard of intenational honesty. The inevitable and often burdensome additions of territory that have come to England as a result of the war appear to them the fruits of deep-laid Machiavelian British scheming. It is really amusing to hear a German's acid praise of this fictitious England that he has evolved from his own jaundiced imagination.

The Joy Of A Perfect Skin

Know the joy and happiness that comes to one thru possessing a skin of purity and beauty. The soft, dainty, linguished appearance it renders brings out your natural beauty to its full est. In use over 70 years.

A Prize for Britain

The Largest and the Most Wonderful Airship in the World

Some time this week there will arrive in England from Germany Zeppelin L-71, the largest and most wonderful airship in the world. Surrendered to Britain as part of the penalty of defeat, it has been reported on several occasions that this airship had been so effectually crippled by the Germans that it would be impossible to navigate it. That would be quite in keeping with the long list of attempted evasions of peace terms of which the foe has been guilty. But, whatever the truth of that story, the fact now is that the vessel is ready to fly to England, and will become a part of the British aerial fleet, the most modern in existence.

It is not improbable that the L-71 may be used in some of the contemplated flights to the more distant overseas Dominions. In navigable weather conditions this would be an easy feat for the craft, which has a flying radius of 12,000 miles. The provision of proper landing stations might be the chief obstacle to a tour to Australasia via Canada, or a journey to India by way of Egypt. Plans like these are talked of in Britain, which is quite used to airships of the latest kind, though the L-71 will be a new wonder there, as it is twice the size of the famous R-34 that flew to the United States and back with ease last year. As an object lesson for the Dominions in the possibilities of aerial communication it would be worth while to spend some money in visits of the Great Zeppelin to Empire countries.

Such a tour would also include a flight over the city of New York, for the bombing of which the monster airship was avowedly constructed. London and other English cities know what death and destruction the smaller Zeppelins can inflict. New Yorkers might at least guess what would have happened to their city had the L-71 been ready for action before the war ended. Whether she comes to this side of the ocean or not it may be taken for granted that Britain will put the surrendered aerial masterpiece to good use of itself and as an instrument of instruction for its own aircraft designers and builders.—Toronto Globe.

To Entertain V.C.'s at Exhibition

A movement is on foot to have the 30 or 40 men in Canada who have won the Victoria Cross, meet at the Canadian National Exhibition, Toronto, and invitations will be sent out with this in view. It is proposed to specially honor the V.C.'s at the exhibition.

CUTICURA HEALED BABY'S RINGWORM

On Head. Cross and Fretful. Hair Fell Out.

"When my baby was three months old her head broke out in little red pimples and then in a week it broke out in ringworms. The ringworms were very large and there were several on her head, and her scalp would bleed. She was very cross and fretful at times, and her hair was falling out.

"I used Cuticura Soap and Ointment, and after I had used one cake of Cuticura Soap and two boxes of Cuticura Ointment she was healed." (Signed) Mrs. Lelah Sargent, Nampa, Idaho, Feb. 24, 1919.

Use Cuticura Soap, Ointment and Talcum for all toilet purposes.

Soap 25c. Ointment 25 and 50c. Sold throughout the Dominion. Canadian Depot: Lymans, Limited, St. Paul St., Montreal. Cuticura Soap shaves without mug.

Strangling the League

United States is Largely Responsible For Existing Difficulties

Had the United States followed the European Allies in Ratifying the Treaty of Versailles it is reasonable to suppose that by this time the league of nations would have been on its feet, and that much of the existing confusion would have been prevented. At present a rather common American pose is one of indifference to European affairs. Neither this attitude nor any other assumption of blamelessness can alter the fact that the United States is largely responsible for the existing difficulties and for the loss of much which was thought to have been gained by the victory of justice and democracy.—Cleveland Plain Dealer.

To Publish Missionary Sketches

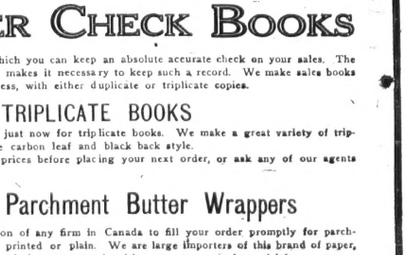

Rev. Dr. Hugh McKellar, of Calgary, is in Toronto arranging for the publication of a book to preserve the memories of pioneer Presbyterian missionaries in Manitoba, Alberta and British Columbia. The book will contain interesting sketches written by living missionaries, and stories of other founders of Presbyterianism in the west.

Your Eyes

Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggists or by mail 60c per Bottle. For Book of the Eye free write to Murine Eye Remedy Co., Chicago.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

For Colds, Pain, Headache, Neuralgia, Toothache, Earache, and for Rheumatism, Lumbago, Sciatica, Neuritis, take Aspirin marked with the name "Bayer" or you are not taking Aspirin at all.

Accept only "Bayer Tablets of Aspirin" in an unbroken "Bayer" package which contains complete directions. Then you are getting real Aspirin—the genuine Aspirin prescribed by physicians for over nineteen years. Now made in Canada.

Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

COUNTER CHECK BOOKS

Provide the only means by which you can keep an absolute accurate check on your sales. The new luxury tax and sales tax makes it necessary to keep such a record. We make sales books suitable for any line of business, with either duplicate or triplicate copies.

TRIPLICATE BOOKS

There is a heavy demand just now for triplicate books. We make a great variety of triplicate books, both in separate carbon leaf and black back style.

Write us for sample and prices before placing your next order, or ask any of our agents to give you this information.

Vegetable Parchment Butter Wrappers

We are in the best position of any firm in Canada to fill your order promptly for parchment butter wrappers, either printed or plain. We are large importers of this brand of paper, and have special facilities for printing wrappers in either one or two colors of ink.

WAXED PAPERS

We also manufacture a complete line of waxed bread and meat wrappers, plain or printed, waxed paper rolls for home use, and waxed papers for all purposes.

Our equipment is the most modern and complete to be found in Canada. Our goods are first class and our service is prompt. Let us prove this to you on your next order for Counter Check Books, Parchment Paper, or Waxed Paper.

APPLEFORD COUNTER CHECK BOOK CO., LTD.

HAMILTON, ONT.—BRANCH OFFICES AT TORONTO, MONTREAL, WINNIPEG AND VANCOUVER

Encourage Dairy Industry

Will Sell Pure Bred Stock on Easy Payments

To encourage the development of the dairy industry the Saskatchewan Government has sent A. J. Clark, of the live stock branch, to the east to purchase one hundred head of young grade dairy cows and heifers.

An effort will be made to secure as many Shorthorns of a good milking strain as possible and the rest will be grade Holsteins and Ayrshires.

These cows will be sold on easy terms to farmers already engaged in the dairy business or who are entering it, who will agree to have all cows purchased from the department bred to pure bred sires of the same standard strain.

What For?

Just why America should be feverishly building huge battleships and battle cruisers at a rate that will soon make us the strongest naval power on earth is a question that is interesting Great Britain, Japan, and some people in our own land. The launching of the "Tennessee," the world's largest battleship, has renewed talk about this matter.—Literary Digest.

Nine men constitute a jury in Mexico, and a majority gives the verdict. If the jury is unanimous there is no appeal.

Faint and Dizzy Spells.

Weakness and Shortness of Breath.

You can generally tell when the heart is affected by the faint and dizzy spells, the shortness of breath, palpitation, throbbing, irregular beating, smothering sensations, weak, sinking, all-gone feeling, choking sensation, etc.

Many men and women become rundown and worn out when otherwise they could be strong and healthy if they would only pay some attention to the first sign of heart weakness.

No remedy will do so much to make the heart regain strength and vigor, regulate its beat and restore it to a healthy and normal condition as Milburn's Heart and Nerve Pills.

Mrs. C. A. S. Drake, Paris, Ont., writes:—"I have used on towards the second box of Milburn's Heart and Nerve Pills and find they have done me good. I had those fainting, dizzy spells, once in a while, and also weakness and shortness of breath, and would become so choked up at times I could hardly sleep without sitting up in bed. When walking too fast I would have to stop and try to catch my breath. I feel a lot better since I have used your pills and know that they have helped me wonderfully as I have improved very much."

Price 50c. a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The barn owl, when she has young, brings a mouse to her nest about every 12 minutes. As she is actively employed at both evening and dawn, and as both male and female hunt, 40 mice a day is a low computation for the total capture.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms are literally ground up and pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach, and maintaining it in vigorous operation, so that, besides being an effective vermifuge, they are tonical and health-giving in their effects.

In Japanese cities many of the streets are devoted exclusively to the sale of particular articles.

Keeps Baby's Skin Healthy

IF every mother could only realize the danger which lurks in the neglect of chafing and skin irritations she would not take chances on being without Dr. Chase's Ointment to apply after baby's bath.

It arrests the development of eczema and makes the skin soft, smooth and velvet.

60 cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Dr. Chase's Ointment

Just Hides

When Hides Are Sold at High Price Beef Prices Can be Reduced

It is axiomatic in the packing industry that one cent in the wholesale price of hides means an important difference in the price per hundredweight of beef. That is, the higher the return from the hide when sold to the tanner, the lower is the price at which the packer may sell the beef to the butcher, or the higher the price he may pay the farmer. Over 35,000,000 lbs. of hides a year are handled through Canadian packing houses and abbatoirs alone. Not one of these firms has its own tannery. The ultimate magnitude of a price-change of only a few cents may, therefore, be understood.

The cost to farmers in Toronto showed an average 1,000 lb. steer to yield 540 lbs. of carcass meat and 70 lbs. of hide. There were 257 lbs. of waste (manure, shrinkage and evaporation), which were wholly lost, while the remainder was by-product.

If the cost of labor, processing and selling be left out of account, and an arbitrary figure of $10 be taken as the value of the by-product, not including the hide, the difference in the cost of the beef can be easily grasped by the consumer from the following:

Cost of live animal at 12 cents, $120, less by-products, $110, less the value of the hide when hides are 30c per lb.) $21. Therefore cost of 540 lbs. of beef $89, or 16.5 cents per lb. When hides are only 15 cents per lb. and instead of $21 only $10.50 is obtained, the cost is $99.50 or 18.42 cents per lb.

At Yoho Camp

Beautiful Resort in the Yoho Valley Opened to the Public

On July 1st Yoho Camp was opened to the public. This camp will have accommodation for at least 25 people and will be located on the same site as in the past, in the Yoho Valley, about a mile and a half from the foot of the Takakkaw Falls. It consists of about ten wall tents (for sleeping purposes) and each tent will accommodate from three to four persons comfortably.

The rates will be on a basis of five dollars per day; two dollars per bed and one dollar for each meal.

The camp will be situated about 11 miles from Field Station and affords one of the finest long drives in the Rockies. The road crossing the Kicking horse river follows the milky glacier fed streams to where it joins the Yoho River, near the entrance of the valley at Mount Field, round which it swings and up the valley until some precipitous cliffs are reached. Up this it zigzags to a higher level until the camp is reached a short distance from the beautiful Takakkaw Falls. As an alternative this trip can be made by carriage to Emerald Lake, thence Pony Trail, which leads up through forests to the Yoho Pass an altitude of 6,000 feet, where it is joined by the trail from Field over Mt. Burgess. Reaching the summit a wonderful view is obtained. Passing summit Lake, a small beautiful colored lake, the descent is made into the Yoho Valley and to the Camp. This distance from Emerald Lake is about six miles.

Many interesting and charming trips can easily be made from Yoho Camp to Emerald Lake, Yoho Glacier, Takakkaw Falls and Burgess Pass.

The trip to the coast is not complete unless a trip is made at some of the beautiful resorts and view the interior scenery at leisure. Canadian Pacific agents will give full information and descriptive booklets on the various resorts.

Flying Is Safe

Fly About Ten Times Round the World to Every Fatal Accident

Flying is one of the safest pastimes in the world. Judge for yourself. When the United States was training men to fly in France it was found one man lost his life for every 3,400 flying hours spent aloft, says a writer in Boy's Life. If you count that the speed in flying is something like seventy miles an hour on the average, it will be seen that only one life was lost for about 240,000 miles actually flown. In other words, a man while learning to fly, not an experienced pilot, could fly about ten times around the world to every fatal accident. To put it another way, suppose a man drove an automobile one hour a day every day in the year for nearly ten years. The distance covered would be that flown for every life lost in flying. There are few if any pastimes so safe as flying.

Alberta Law Medallist

John Henry Dell, of Medicine Hat, was announced as gold medallist in the final law examinations in Alberta for 1920. Miss Playter, of Calgary, is the only woman to pass her finals this year. She was winner of the Carswell prize.

The largest mass of pure salt in the world lies under a section of Galicia. It is known to be more than 500 miles long.

It is a fortunate thing for most people that they can get used to anything in the course of time.

Methods Used in Seeding Grasses

Farmers Need This Aid to Combat Invasion of Weeds

(Experimental Farm Note.)

Seeding down is rapidly coming into favor in western Canada. Farmers are finding that the fibre in their soil requires replenishing and that they need the grasses to aid in combating the invasion of weeds and with the increase in livestock and the decrease in pasture and hay lands, hay growing is becoming more necessary.

During the past seven years a number of seeding down practises have been tested out on the Scott station. In these experiments western rye grass has been used. This grass has proven hardy and drought resisting and because it can be more cheaply eradicated than the brome grass it is recommended for the most conditions. On light soils brome grass can be used to good advantage since it provides a large amount of fibre and on such soils, once, or at most twice ploughing will destroy most of the brome grass.

The best yields of hay can be obtained by seeding down on summer-fallow land. But since most farmers take off at least two crops of grain between fallows it may be advisable to seed down with the second or in some instances the third crop. The number of weeds in the soil as well as the hay requirements of the farm will be the deciding factors in this regard. Seeding down on summer-fallow has on this station given one-half ton per acre more than seeding with the second crop. If the seeding can be done comparatively early in the season, sowing with a nurse crop will give more profit per acre than seeding the grass alone. The grain crop should pay for the preparation of the land, while the only charges against the hay crop should be the seed, rent of land and cost of the harvesting. Barnyard manure ploughed under previous to seeding down has not only resulted in an increased yield in the first crop, but this increase has extended into the succeeding years.

In order to secure a catch it is usually advisable in dry districts to drill the seed in rather than sow it on the surface, consequently in seeding down with a nurse crop it is best to mix the grass seed with the grain and if grain is a little damp from the formalin treatment the grass and grain will feed more evenly through the drill.

The following are some conclusions drawn from the results of the experiments made at Scott.

Sown with a nurse crop or sown alone no hay crop can be expected the first year.

Grasses will aid in controlling the weeds, but the weeds must be controlled until the grasses are well started.

The yields of the first hay crop will depend on the method adopted in seeding down, but the yields in the succeeding years will depend on the moisture supply.

Cultivated grasses have not usually yielded profitable crops for more than three years.

In breaking up grasses in dry districts summer cultivation for one season is usually required to store up sufficient moisture for the production of grain crops.

In introducing the grasses into the scheme of farm crops it is advisable to make some systematic arrangement of crops and thus have a definite rotation.

A rotation including grasses results in less weeds, more soil fibre and less soil drifting.

National Industrial Meet

Will Follow Up On the Conference Held Last Year

Plans are under way for the calling of another national industrial conference, at which both capital and labor will be in attendance. The appropriation for this purpose was provided by parliament in the Department of Labor estimates which passed during the last week of the recent session.

The conference held last year, it is felt, was productive of good results in bringing capital and labor together and ironing out many incipient differences. This year it is hoped to continue the good influence started last September.

It is not likely that the conference this year will take place before September or October, but the probable dates are expected to be announced in the near future.

In Burma people of superior rank must not dishonor themselves by passing underneath persons of inferior rank. Thus a nobleman must not pass through a hall when a servant is occupied in a chamber above. This is one of the chief reasons why most of the houses in Burmah are but one storey.

Although sometimes seen 400 leagues from land, the frigate-bird is said to return every night to its solitary roost.

At Lima, Peru, the sun is scarcely ever hidden by clouds for a day throughout the whole year.

When a humming bird is stripped of its feathers it is no larger than a bumble-bee.

Ice Mines

Wells Are Incrusted in the Hottest Months of Summer

A miner, prospecting for lead, many years ago, blew a shaft into a rocky hillside at Bixby's Park, near Edgewater. The mine was abandoned, but the following year its walls, and the cavern leading from it, were discovered incrusted with ice; and this ice has been reappearing annually, and strangely enough, in the hottest part of summer.

Natural scientists, to explain this phenomenon, claim that owing to the peculiar formation of the caverns the cold air of winter does not penetrate and settle in them until late in the spring. At that time the water from the spring thaws is seeping its way through, and, meeting this cold air, freezes. It remains there frozen all summer. In July and August picnic parties may be seen freezing ice cream at the mouth of the ice mine with ice they have chopped from its walls. There is said to be a larger ice cave in the cliffs at Deborah, whose winding passages extend back for miles into the hills, and that there is evidence that the Indians had discovered this in the old days and used them as storage places for their food in summer.

Another Case of Blood Poisoning

Persisted in paring his corns with a razor. Foolish when cure is so painless and sure with Putnam's Corn Extractor. Use Putnam's only—it's the best—guaranteed and painless, price 25c. at all dealers.

Vancouver Produces Tons of Strawberries

Holds Highest Record for Production Per Acre in Canada

More than 600 tons of strawberries were harvested in the districts of Gordon Head and Keating, on Vancouver Island, during the season 1919, and they sold for about $212,750, at an average price of $355 per ton.

Under careful cultivation strawberries are producing from $500 to $700 gross per acre, and the total space devoted to last season's crop was about 400 acres. This district holds the highest record for production per acre in Canada.

Last year's production represents a mere tithe of what the Island is expected to produce this season, for this luscious fruit thrives in many parts of the island and the market for strawberries is larger than for any other fruit.

Canners from Western Canada contract for strawberry pulp. Jam factories require fresh strawberries not suitable for shipment and for the fresh fruit for table use there is always a demand greater than the supply.

With a climate softened to a degree that at times approximates the semi-tropic by the Japanese current, this region seems destined to become one of the greatest producers on the continent.

$100 Reward, $100

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work. $100.00 for any case of Catarrh that HALL'S CATARRH MEDICINE fails to cure.

"Corner" in Storms

The Island of Java owns up to an average of 97 storms a year, or approximately two a week, the world's record. Sumatra stands beside Java, with 86 per annum. Borneo and the Gold coast, have 50 each, Rio de Janeiro, 52; Italy, 38; Buenos Ayres, Canada and Austria, 23. France and South Russia, the colder regions, have 16 apiece, Spain and Portugal 15, Sweden and Finland eight. East Turkestan gets off very lightly with a total of—none!

Alien Immigration On the Increase

No Shortage of Foreign Labor in U. S. Anticipated

The present immigration situation portends no curtailment of the supply of foreign labor in the United States, Frederick A. Wallis, commissioner of immigration at Ellis Island, commented in making public statistics for the fiscal year just ended.

Although total departures were 334, 254, or 19,736 in excess of arrivals, he declared that the incoming tide of aliens steadily is increasing. He pointed out that the immigration station was not re-opened on a pre-war basis until last March, and that most of the outgoing aliens are bringing their families back when they return.

Immigrants are arriving as fast as they can obtain transportation, Mr. Wallis said.

In Java it is supposed that if a live sheep is thrown into the water it will indicate the position of a drowned person by sinking near it.

Should Eliminate Non-Laying Hen

Makes More Room and Keeps Feed Bills Down

The season of the year is at hand when poultrymen should be considering the advisability of eliminating non-laying hens from the flock. Eliminating the non-laying hen has a tendency to keep the egg production at a high level, makes more room for those that are laying during the hot weather and besides this it helps to keep the feed bills down. Early quitters are poor breeders. Probably from five to ten percent of the birds in the flock are not laying at this season of the year and could advantageously be eliminated. It does not follow that all broody hens should be taken out for many of then will start laying again as soon as the broody period is broken up. On the other hand, birds that are moulting at this season will, as a rule, be found non-productive. It is best to give the hens the benefit of the doubt and no hens should be convicted until all the evidence has been examined. It is perhaps best to examine the shanks, beak, earlobes (in the light breeds), and the vent to determine whether they are pale or yellow in color. Yellow in these parts denotes hens that are moulting and will help when used properly to eliminate the non-laying hens.

Minard's Liniment Relieves Diptheria.

Sardine Fishing

Along the Pacific coast seaplanes are used in hunting sardines by the canning factories. Since the first of the year naval seaplanes have been flying out from the sea coast, sighting schools of fish and sending a wireless back to the naval station giving the direct location. The naval station then telephones the information to the office of the fish and game commission. Fishing fleets are immediately directed exactly where to seek their game and are consequently assured of a big catch.

HOW TO OVERCOME NERVOUS TROUBLES

A Returned Soldier Tells How He Regained Health And Strength

Nervous troubles of all kinds, particularly nervous debility, work a remarkable transformation in the patient. The change is both physical and mental. The sufferer loses weight and strength, and frequently becomes irritable and fault finding. Troubles that were once thrown off without any difficulty assume exaggerated proportions. Other symptoms of this nervous condition are poor appetite, headaches, exhaustion after little effort, and frequently distress after meals.

The cause of this debility is generally starved nerves. The blood, which gives the nervous system its food and power to work efficiently, has become thin and weak, and until the blood regains its tone and strength there can be no improvement in the condition of the nerves. In cases of this kind Dr. William's Pink Pills will be found the very best medicine. They make rich, red blood which feeds and strengthens the starved nerves, and in this way restores the sufferer to full health and strength. Proof of this is found in the case of Mr. Fred Sander, London, Ont., who says: "while on service with the Imperial forces in Africa I completely lost my health through continual hardship and shock. I was sent back to the base hospital suffering, so the doctor said, from nervous debility. After spending some time in the hospital I was invalided back to England as unfit for further service. After spending a long time in Netley hospital, I was given my discharge, but was still a weak and nervous wreck. I had neither the strength nor ambition to do anything. In London I doctored for three or four months with a civilian doctor, who finally advised a change of climate. I was terribly nervous, suffered from sleeplessness, smothering and sinking spells, and pains in the heart; my hands and feet were always cold and clammy. At this time I decided to come to Canada, and shortly after reaching this country was advised to try Dr. Williams Pink Pills. After I had taken the pills for some weeks I found myself improving. I continued taking the pills for several months with the result that they fully restored my health. My nerves are now as steady as a rock; my appetite is the best, and my eyes and skin, which had turned yellowish, are clear and healthy looking. I feel like a new man in every way and fit for anything. I have since recommended the pills to several friends, and know of several cases where they were beneficial in the influenza epidemic. I am of the opinion that should any of my returned soldier comrades use Dr. Williams Pink Pills for shell shock, they would be a great help to them."

You can get Dr. Williams Pink Pills through any dealer in medicine, or by mail, post paid, at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

Given Supreme Power

Supreme power in the government of Poland and full military authority has been vested in a national council of defence which was created by the Polish diet.

"DANDERINE" FOR FALLING HAIR

For a few cents you can save your hair and double its beauty

To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of delightful "Danderine" at any drug or toilet counter for a few cents, pour a little in your hand and rub it into the scalp. After several applications the hair usually stops coming out and you can't find any dandruff. Help your hair grow strong, thick and long and become soft, glossy and twice as beautiful and abundant.

The Poorly Paid Teacher

In Cobalt, Ontario, they are advertising for chore boys at $130 per month and teachers for less than $90 a month. Some day the teaching profession will come into its own proper status and the value of education in the community will be recognized in its true worth.—Clinton New Era.

A Power of its Own.—Dr. Thomas' Eclectric Oil has a subtle power of its own that other oils cannot pretend to, though there are many pretenders. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man or beast.

New Coal Field Being Developed

Kamloops Will Have A Mining Proposition Within 50 Miles Of Its Limits

A mining deal which may result in the development of a new British Columbia coal field has just been concluded by the bonding of the Chua coal-bearing lands on the North Thompson River to the Queen Bess Mining Corporation of Seattle. About $500,000 is involved in the transaction.

If the potentialities of the district prove to be up to expectations, Kamloops will have a mining proposition within fifty miles of its limits, and a new source of supply will be opened to the mountain division of the Canadian Pacific Railway.

Arrangements have been made for development work to start immediately and the promoters hope to be shipping about 100 tons a day in two months' time. Development work on the Chu Chu claims were started by the C.P.R. a score of years ago, but owing to lack of facilities, operations were stopped and have never since been resumed. The coal is stated to be of a bituminous character suitable for engine fuel, and is of high grade.

Minard's Liniment Relieves Colds, etc.

Produced Minerals at $254,001,586

Minerals to the value of $254,001,586 have been produced since the discovery of silver at Cobalt in 1903, and the finding of gold in the Porcupine and Kirkland Lake districts about six years later, according to returns based on officials figures. Dividends paid by the mining companies have aggregated $99,437,321.

These Pills Cure Rheumatism.— To the many who suffer from rheumatism a trial of Parmelee's Vegetable Pills is recommended. They have pronounced actions upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and they will speedily give evidence of their beneficial effects.

Take Action Against Government

The press states that 20,000 Canadian ex-soldiers now in Great Britain will take action against the Canadian government for arrears of army pay alleged due through breach of contract. The dispute is on the question of the rate of exchange.

Apart from the human species, no land animals can sing.

Kept Kipling's Checks

Author's Balance in Bank Did Not Decrease

At one time Rudyard Kipling paid his bills, no matter how small they happened to be with checks. After awhile he discovered, to his amazement, that his bank account showed a much larger balance than the stubs of his check book warranted. In fact, while he was drawing checks for small amounts almost daily, his money in the bank did not seem to dwindle in the least. For a long time he was at a loss to account for this astonishing fact until he happened one day to visit an office, the occupant of which was an enthusiastic autograph collector. There the author saw one of his own checks, framed and hanging on the wall. The mystery was solved. It appeared that the local shopkeepers found that they often got more for Kipling's checks by selling them to autograph hunters than they could by cashing them at the bank, and so, although the author kept drawing checks, his balance remained almost intact.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

The history of horse-racing dates back more than 600 years, and racing in England was known to exist as early as the tenth century.

THIS WOMAN'S RECOVERY

Shows Remarkable Curative Power of Lydia E. Pinkham's Vegetable Compound.

Chesley, Ont.—"Before using Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had terrible pains in my sides and was not regular. Finally I got so weak I could not go up stairs without stopping to rest half way up the steps. I tried two doctors but they did me no good. I saw your medicine advertised in the newspapers and thought I would give it a trial. I took four bottles of the Vegetable Compound and was restored to health. I am married, am the mother of two children, and do all my housework, milk eight cows, and do a hired man's work and enjoy the best of health. I also found Vegetable Compound a great help for my weak back before my babies were born. I recommend it to all my friends who are in need of medicine, and you may print this letter if you wish."—Mrs. Henry Janke, R. R. No. 4, Chesley, Ontario.

It hardly seems possible that there is a woman in this country who will continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

Agriculture

It is imperative that every agriculturist form a sound association with a progressive banking institution. This is the ultimate production by providing a broad service for ambitious farmers. Any of our 400 branches can furnish reliable information as to markets and shipping facilities.

Resources exceed $174,000,000.

GOVERNOR COX OF OHIO

Is Democratic Candidate for U. S. President

San Francisco, July 5.—After an adjournment over Sunday, 22 more ballots were necessary to select the Democratic candidate for President, Governor Cox, of Ohio, finally being unanimously nominated. The break from Palmer came at the 36th ballot, when McAdoo went to 440, Cox to 468½, and Palmer dropped to 74. Cox gained steadily until the 43rd ballot, when he had 568 and McAdoo 415.

Franklin D. Roosevelt, of New York, Assistant Secretary of the Navy, was nominated for Vice President.

Framed after days and nights of struggle with clashing interests and opinions, the resolutions committee draft of the Democratic platform, left two questions for final settlement on the floor of the convention hall.

These were prohibition enforcement, upon which no agreement could be reached by the committee, and the Irish question. The plank adopted by the committee on this subject was not considered strong enough by the Sinn Fein faction, who served notice that they would seek to have the planks written to include a flat declaration for diplomatic recognition of the "Irish Republic."

Following is the text of four planks which are of particular interest to Canadians, those dealing with the League of Nations, Ireland, Inland Waterways, and the Tariff.

League of Nations

"The Democratic party favors the League of Nations as the surest if not the only practical means of maintaining the permanent peace of the world, and terminating the insufferable burden of great military and naval establishments. It was for this that America broke away from traditional isolation, and spent her blood and treasure to crush a colossal scheme of conquest. It was upon this basis that the president of the United States, in pre-arrangement with our allies, consented to a suspension of hostilities against the German government. The armistice was granted and a treaty of peace negotiated upon the definite assurance to Germany, as well as to the powers pitted against Germany, that a general association of nations must be formed, under specific covenants, for the purpose of affording mutual guarantees of political independence and territorial integrity to great and small states alike. Hence we not only congratulate the president on the vision manifested and the vigor exhibited in the prosecution of the war, but we felicitate him and his associates on the exceptional achievements at Paris involved in the adoption of a league and treaty so near akin to previously expressed American ideals, and so intimately related to the aspirations of civilized peoples everywhere.

"We commend the president for his courage and his high conception of good faith in steadfastly standing for the covenant agreed to by all the associated and allied nations at war with Germany, and we condemn the Republican senate for its refusal to ratify the treaty, merely because it was the product of Democratic statesmanship, thus interposing partisan envy and personal hatred in the way of the peace and renewed prosperity of the world.

"The intent of congress and the intent of the president was that there could be no peace until we could create a situation where no such war as this could recur. We cannot make peace except in company with our allies. It would brand us with everlasting dishonor, and bring ruin to us also if we undertook to make a separate peace.

"We endorse the president's view of our international obligations, and his firm stand against reservations designed to cut to pieces the vital provisions of the Versailles Treaty, and we commend the Democrats in congress for voting against resolutions for separate peace, which would disgrace the nation. We advocate the immediate ratification of the treaty without reservations, which would impair its essential integrity; but do not oppose the acceptance of any reservations making clearer or more specific the obligations of the United States to the League of Nations."

"We reject as utterly vain, if not vicious, the Republican assumption that ratification of the treaty and membership in the League of Nations would in any way impair the integrity or independence of our country. The fact that the covenant has been entered into by twenty-nine nations all as jealous of their independence as we are of ours, is a sufficient repudiation of such charges.

Ireland

"The great principle of national self-determination has received constant reiteration as one of the chief objectives for which this country entered the war and victory established this principle.

"Within the limitations of international comity and usage, this convention repeats the several previous expressions of the sympathy of the Democratic party of the United States for the aspirations of Ireland for self-government.

The Tariff

"We re-affirm the traditional policy of the Democratic party in favor of a tariff for revenue only and to confirm the policy of basing tariff revisions upon the intelligent research of a non-partisan commission, rather than upon the demands of selfish interests, temporarily held in abeyance.

Inland Waterways

"We pledge ourselves to the further development of adequate transportation facilities on our rivers and to the further improvement of our inland waterways and we recognise the importance of connecting the Great Lakes with the sea by way of the Mississippi and its tributaries, as well as by the St. Lawrence river."

The Democratic platform as framed in the resolutions committees, declaring for the peace treaty, expressing sympathy for Ireland and saying nothing at all about prohibition, came unscathed through a furious floor fight and was adopted without amendment in a great avalanche of applause.

Dramatic Day of Debate

W. J. Bryan led the fight for adoption of his bone-dry plank, but it was buried after a dramatic day of debate by a majority so overwhelming that he did not even ask for roll calls on the four other minority reports which he had proposed. A cider, wine and beer plank, championed in an emotional speech by W. Burke Cockran, New York, also was thrown out by the convention along with them a plank for recognition of the Irish republic backed by several organizations of Irish sympathizers.

In the battle for the platform as framed, the administration forces were led by Secretary Colby and by Senator Glass, Virginia, during a debate, which stirred delegates and spectators to repeated bursts of enthusiasm. Mr. Bryan got a warm demonstation of 23 minutes after he concluded his speech for the bone-dry plank, but when the balloting began it became apparent that much of the enthusiasm was a personal tribute to his past service to the party and not an expression of sympathy with his present views.

When the convention reached a roll call on the Bryan dry plank, state after state announced a majority against the dry plank. Mr. Bryan was beaten out 929½ to 155¼. Eight delegates did not vote. A sub-prohibition plank proposed by Mr. Hobson, Alabama, was rejected by the convention without roll call. The beer and wine plank of W. Bourke Cockran, New York, was defeated 726½ to 356.

Without a roll call the convention voted down Mr. Bryan's planks for the publication of an official newspaper by the government and against profiteering, and against compulsory military training in peace times. The Bryan League of Nations shared the same fate.

The plank for a commission to investigate the feasibility of a soldier bonus was also rejected without a roll call. The sub-Irish plank was next in order, and a roll call was ordered on it. This proposal which declared it to be the "purpose of the nation to recognise the independence of the Irish republic," was voted down. The vote on the Irish plank was as follows: yes, 102¾; no, 665¼, absent 160.

Then chairman Glass moved the adoption of the platform itself and it went through as framed with a roar.

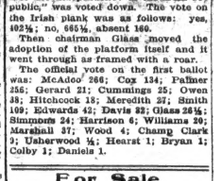

The official vote on the first ballot was: McAdoo 266; Cox 134; Palmer 256; Gerard 21; Cummings 25; Owen 38; Hitchcock 18; Meredith 37; Smith 109; Edwards 42; Davis 22; Glass 24½; Simmons 24; Harrison 6; Williams 20; Marshall 37; Wood 4; Champ Clark 9; Usherwood ½; Hearst 1; Bryan 1; Colby 1; Daniels 1.

Alex Thompson, Auctioneer

5-12-No. 20626|34

In the Matter of the Railway Act and in the Matter of the Right-Of-Way of Lacombe and North-Western Railway Company, Across That Portion of the North East Quarter of Section Twenty-Three (23), Township Forty (40), Range Twenty-Eight (28), West of the Fourth Meridian Described in Certificate of Title No. 106 C. 37.

To Harry Henry Fry Esq., Los Angeles, California, U.S.A.

And to all others whom it may concern—

Take Notice that pursuant to the provisions of "The Railway Act" and the award made by H. G. Scott sole arbitrator appointed by order of the Honorable Mr. Justice Hyndman dated the 3rd of May 1920, the Lacombe and North Western Railway Company has made payment to the Clerk of the Supreme Court of Alberta, at Edmonton, of the sum of $42.96 being the amount of compensation awarded by the said arbitrator with the interest thereon and has also delivered to the said Clerk an authentic copy of the said arbitrator's award.

And Further Take Notice that all persons claiming an interest in or entitled to the lands in respect of which the aforesaid award of compensation has been made are required to file their claims to the said compensation or any part thereof in the hands of the Clerk of the Supreme Court of Alberta, at Edmonton aforesaid, on or before the 30th day of July A. D. 1920.

And further take notice that the Title of the Company (that is the aforesaid award) being for 1.15 acres more or less, of the lands above described, is under "The Railway Act."

Dated at Edmonton, in the Province of Alberta, this 6th day of July, A.D. 1920.

Lacombe and North Western Railway Company.

By its Solicitor J. BOYD McBRIDE of Short, Cross, MacLean & McBride. Merchant's Bank Building, Edmonton.

NOTICE

Articles of correspondence, district news, Meeting notices, and all other reading notices MUST be in this office by Monday night, in order to appear in the current issue, and we would ask our contributors to govern themselves accordingly.

Bolshevism in Germany Dead

Berlin, June 20, (By Mail)—Bolshevism or communism, or whatever you may call it, is dead so far as the German people are concerned if the evolution of events in the much debated Ruhr district is to be taken as an indication of what one may expect under the Soviet rule, says the well known writer on social questions, Dr. Paul Michaelis in the Berliner Tageblatt."

Nowhere in Germany could the conditions for success of this form of government possibly have been better than in this district with its numerous large cities and independent communities, but nowhere could failure have become evident more quickly than it happened there, he points out.

The local Bolshevists had their entire organization planned in every detail and in full working order as early as the middle of March last. Every single workman throughout the entire district had been enrolled in a military company, and amply supplied with arms and ammunition. It is a question, however, whether it be true that these troops had been drilled by Russian Bolshevist Officers.

The signal to start the revolution was given by the Bolshevist Leaders and at first the movement was eminently successful. The bourgeois parties had evidently made up their mind that if they gave the Bolshevists plenty of rope they would lose no time in hanging themselves, and this calculation proved correct.

The Bolshevist leaders fell victims to their too rapid progress. They had know how to organize the masses for a fight, but when there was nobody to fight, they very soon proved themselves hopelessly devoid of constructive ideas, and all they could do was to imitate a parrotlike manner all the worst features of Old Prussian militarism.

"If "Verboten" had been the most used word in Germany before the war, it was now applied to practically everything. The number of arbitrary proclamations and orders issued was enormous and applied to all the most elementary necessaries of living. You simply could not breathe without infringing some rule and thereby expose yourself to the heaviest kind of penalties. The press was completely muzzled, the censorship interfered in everything, the hours during which you were permitted comparative freedom in the public streets were curtailed to an extent never known before under any state of siege, and simultaneously the "government" was frantically enlisting recruits for the ranks of the red army at daily wages of 55 marks with board, lodging and uniform.

Heavy levies amounting in many cases to several millions of marks, were demanded from towns and cities and when the municipal authorities refused to submit to this blackmailing they were thrown into prison. Banks were robbed of their deposits, and the Bolshevist leaders surrounded themselves with luxury. When after a very short time they were unable or unwilling to pay their troops they began to commandeer all kinds of goods from the ordinary citizens; and not only clothing of every description was issued to the mercenaries, but even ladies underwear, and silk stockings, brass beds and jewelery. All beer and wine and spirits available was commandeered for the use of the Bolshevist leaders.

Gradually it became evident even to these leaders themselves that this could not last, and one after the other they began to depart to parts unknown in stolen automobiles. Then slowly it began to dawn upon the rank and file that the game was up, and little by little they dropped almost shamefacedly all the emblems of their power. Men who had recently roamed about spreading terror everywhere, wearing cartridge belts and bayonet, now dropped even their red neckties and scarves and took to wearing collars until they were seen lounging on every street corner as peaceable, harmless citizens calmly awaiting the evolution of events.

The red nightmare has disappeared. Germans have no love for liberty and they do love order, and discipline as it has been drilled into them from the days of Frederick the Great. Certainly they have no genius for revolution.

Once more accusations of having committed all kinds of cruelties against the civil population are being made against German troops. The novelty this time is that it is the Germans themselves who are the accusers and not Belgians or Frenchmen.

The "Mains Volkszeitung" brings very grave accusations against the troops of the Reichswehr which recently were sent into the neutral zone only to be recalled after the occupation of Frankfort by the French.

The troops from Wuerttumberg the paper says, generally behaved very well, but the Bavarians especially one regiment under the command of a Colonel Epp, committed all kinds of crimes quite as if they were in a hostile country. The latter sentence is significant.

A wave of crime is sweeping over Berlin and the police appear to be completely unable to cope with the growing fraternity of criminals. The number of burglaries committed every night is almost incredible; during the last two months more than 1,200 have been committed in the West end of Berlin alone. In spite of the fact that in the last two years more than three thousand burglars have been arrested the number of those still active seems as great as ever. They steal everything from jewelery to heaviest kinds of furniture.

Nothing strikes the visitor to Berlin as more appalling than the miserable appearance of the majority of children here, and if the official figures of the International Society for the relief of Suffering Among Children are to be believed conditions are the same in practically every town or city in Germany.

A recent report of the society states that practically all children throughout this country are in need of assistance. Average weight of a German boy of ten is barely 54 pounds, of a boy of 14, 78 pounds; and of a girl of 13 only 70 lbs. These figures were confirmed by statements recently gathered by the municipal authorities of Frankfort.

A prominent Swiss specialist who recently visited Germany to look into the state of health of German Children found in one school in Liepzig more than 50 per cent. of the scholars suffering from severe illnesses, principally consumption. In Leipzig alone he found more than 8,000 in Cologne, 10,000 and in Berlin over 30,000 children affected with consumption of the lung. Mortality among children has gone up with 25 per cent., among babies and with 186 per cent. among older children. In one Berlin school (public school 115), attended by 650 children, 305 had no regular bedroom, 306 lived in homes where fires were unknown, and 371 never tasted a drop of milk. Altogether it is said that the number of children in Germany who have succumbed to consumption and starvation is far above a million.

Pilgrim Clifford Roberts will lecture in the Rex Theatre on Tuesday, July 20, under auspices of The Watch Tower Bible and Tract Society. Subject: "The World has now ended: millions now living will never die." Free admission: no collection. (1c)

J. C. McCormick, of A. M. MacDonald's office, was successful in passing his second intermediate law examination held recently.

LINCOLN NEWS

On July 1st, the people of this district joined with the Meadowbrook residents and thoroughly enjoyed themselves at a picnic held at Gull Lake at Mr. Alex Wilson's corner. Lunch was served at noon, and afterwards sports were enjoyed. There were many entries for the various events, some of which were very amusing. Members of the Riley families and Long families were the principal winners. Mr. Miller, the Presbyterian minister, was very much in evidence and proved himself to be some sprinter.

Mr. Dewar has purchased a C.P.R. quarter in the district and intends working it right away.

The Rathje boys are herding a big bunch of cattle in our district again this year, having brought in about one hundred head.

The Rev. M. Barr, of Lacombe, was in the district during last week.

Miss M. E. A. Smith spent last week end with Mrs. J. A. Dutton. Miss Smith is en route to the Old Country.

S. D. A. Camp Meeting Opens

Arrangements have been made to hold the annual camp meeting of the Alberta conference of Seventh-Day Adventists in Calgary, July 15 to 25, and a city of about 125 tents will be erected to accommodate those who are coming from various parts of the province. In addition to the tents for living in, there will also be large canvas pavilions for the main business meetings, preaching services, young people's and children's gatherings, a large dining tent where meals will be served on the cafeteria plan, a large literature tent where different kinds of gospel books, periodicals and tracts will be on exhibition, and a reception tent and mother's tent.

Considerable expense will be required to carry on this great conference, and even though this is a regular annual arrangement of the Seventh-Day Adventists, yet the leaders consider it a very profitable investment for the upbuilding of the Gospel work. The various churches in the province are notified weeks ahead and delegates are chosen to represent them at the conference. Many others, of course, attend who are not regular delegates and all come anticipating a rich spiritual feast and return to their homes very much strengthened and encouraged in the faith and take up with new zeal the plans marked out for the advancement of the denominational work.

Not only will all ministers and gospel workers in the province be present, but other leaders from the General conference whose headquarters are at Washington, D.C., will be there. These will take active part in the daily programme.

President A. J. Haysmer will be chairman of the entire convention. Among the leaders from the General Conference will be Professor W. W. Prescott, World Secretary of the Seventh-Day Adventists. He will have much to say regarding his travels in the Oriental lands. Elders G. W. Petit from India, and L. T. Boettcher from Russia, will have many interesting things to tell of their experiences in the far off countries of the world. President A. C. Gilbert from Vancouver, the official head of the Western Canadian Union, Elder J. J. Reiswig, the Educational and young people's secretary for the Union, and Mr. G. A. Campbell, the Union Field Secretary, will also be present and will hold separate conventions in connection with the camp meeting for those who are particularly interested in their particular departments.

One feature of the camp meeting will be the evening service starting at 7:30 o'clock with a song service by the choir. This choir will be chosen from voices all over the conference, and the leader promises some inspiring music.

Preaching will begin promptly at 8 p.m. Themes of vital importance concerning the distressing situation in the world, the signs of the times, and other important and practical subjects will be considered from a Biblical viewpoint. The speakers chosen for the evening lectures are men of broad experience, and well qualified to handle their subjects in a manner that will be convincing to the hearers.

TORTURED BY TERRIBLE ECZEMA

Suffered Three Years Until She Tried "FRUIT-A-TIVES"

DAME PETER LAMARRE

Pointe St, Pierre, P. Q.

"I think it my duty to tell you how much your medicine has done for me. *I suffered for three years with terrible Eczema.* I consulted several doctors and they did not do me any good.

Then, I used one box of *'Soothe-Salve'* and two boxes of *'Fruit-a-tives'* and my hands are now clear. The pain is gone and there has been no return. I think it is a marvellous cure because no other medicine did me any good and I tried all the remedies I ever heard of, without benefit until I used *'Soothe-Salve'* and *'Fruit-a-tives.'*

'Fruit-a-tives' cooled the blood and removed the cause of the disease, and 'Soothe-Salve' completed the cure."

Dame PETER LAMARRE (fils).

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

Teacher Wanted

Teacher wanted for Carritt S.D. No. 930. Duties to commence Sept. 7. Apply stating experience and salary expected to, Fred C. Nelson, Sec.-Treas., Carritt S. D. Blackfalds, Alta., phone 610 Bentley.

Teacher Wanted

Teacher wanted, man perferred, with 1st class certificate for Blackfalds Village School, senior room, grades VI to XI. Attendance small. Duties to commence August 30th, 1920. Apply stating experience and salary expected to H. Elwell, sec.-treas., S.D. 255.

ROYAL YEAST CAKES

Royal Yeast has been the standard yeast in Canada for over 50 years, and it is a well known fact that bread made with Royal Yeast possesses a greater amount of nourishment than that made with any other.

Co-Operation in Industry

Although sharp differences of opinion may exist throughout Canada as to the methods to be employed to promote the prosperity and development of industry in this Dominion, people are a unit in desiring to see the natural resources of this country developed to their fullest degree for the use and benefit of our own people and in order to enlarge the export trade of Canada.

No thinking man or woman is antagonistic to the building up of great manufacturing industries in Canada; on the contrary, everybody welcomes them, is anxious to see them prosper, and is prepared to do everything within reason to assist their growth in the common interests of all and for the welfare of the Dominion. Opinions may and do differ as to the policies and methods to be adopted to that end, and these are properly open to debate, but it is almost universally recognized and accepted that the primary means to be employed should be scientific and vigorous development of Canada's latent wealth in natural resources of all kinds.

Manufacturers, workingmen and consumers alike stand to benefit greatly through the development for use of those natural sources of wealth with which the several provinces abound. For example, it is a source of national strength and of benefit to all people that, as one propagandist for the great manufacturing interests recently pointed out, Canada should have a great match-making industry. Such an industry calls for the use of many natural products of Canada, gives employment to hundreds of men and women, and to the extent that it supplies the home market and adds to the export trade of Canada, adds to the national strength and financial stability of the country. Our people should welcome and support such industries.

But it is in the interests of all manufacturing industries as well as in the interests of transportation, business generally, and the whole body of the consuming public that the basic industries should receive first and foremost attention, such an industry, for example, as coal mining. Without adequate supply of coal at reasonable prices all manufacturing industry, transportation, and so forth, would be seriously crippled, if, indeed, not brought to a standstill.

Canada has abundant coal deposits, yet this country has for generations imported coal to the extent of tens of millions of tons annually, thus adding to the adverse balance of trade, while our own mines have languished and employment in their development been denied to our people. Now, owing to conditions over which this country has no control, it has become a matter of dire necessity that our people should secure their coal requirements largely at home. Here in the West we must rely almost exclusively this fall and winter upon the output of our western mines, yet, because the lack of development in the past it will be difficult for them to meet the heavy demands so suddenly thrust upon them.

In past years these mines have frequently been idle during the summer months, because there was no immediate demand for coal, and because much of it is of a class that cannot be stored in the open, subject to the weather conditions. It must be stored under cover. This has resulted in labor dissatisfaction, because of "layoffs" at the mines, and the operators have had great difficulty in maintaining full and efficient staffs of workers. Such a condition has also added to the transportation problem, inasmuch as the eastbound coal movement from the Alberta mines to Saskatchewan and Manitoba has come at the same period of the year as the heavy movement of grain from the prairies to the head of the lakes. In other words the two heaviest freight movements have come together, and both have called for transportation in the same direction—from east to west. If one moved west and the other east, the transportation problem would be simple, but two heavy freight movements in one direction, means a return of long trains of empty cars the other way, thus adding enormously to transportation costs which the people have to pay.

Future provision must be made for the transportation and storage of Western coal during the summer months before the grain movement begins in the fall if dangers of grain blockades or an acute coal shortage in severe weather are to be avoided. It is too late to do much in this direction this year, but the people can help very materially and in a simple and thoroughly practical manner by buying their winter's requirements of coal and taking delivery of it into their cellars,—which are the chief existing places of storage — now. A heavy movement of coal in the West during the next six or eight weeks will assist enormously in reducing the costs, preventing grain blockades with a bumper crop in prospect, providing against a coal shortage with its resultant inconvenience and suffering, and largely solve the big transportation problem which otherwise will cripple this country during the coming fall and winter.

Much British Capital

Eighty million dollars of British capital will probably be brought to Canada as a result of the visit of inspection of Count de Toper of London, Eng., and Nice, France. After a tour of investigation of the west he stated that what he had seen warranted his advising his friends in investing between $15,000,000 and $16,000,000 in the Dominion.

Minard's Liniment Relieves Garget in Cows.

Will Exceed Record

Apple shipments from Okanagan Valley to Great Britain during the past season amounted to 320 carloads as compared with only 85 in the best previous year. Inquiries indicate that shipments to Great Britain during the coming year will greatly exceed even this enviable record. Several large British buyers are on their way to British Columbia, including the representatives of both the English and Scottish Co-operative Societies who have not previously been interested in the Pacific Coast products.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionaly to the well child will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Revolutionise Air Navigation

Clinton Turner, a young mechanic residing in Halifax, has invented an airplane, which he claims will ascend vertically from a standing position. He is about to apply to the United States patent office for protection of the patent. Turner states that he has been working on the principle for two years and has just completed a model.

Hard and soft corns both yield to Holloway's Corn Cure, which is entirely safe to use, and certain and satisfactory in its action.

The Dambi river flows through countries in which 52 languages and dialects are spoken.

Birds That Cannot Fly

Wings of Barnyard Fowls Have Become Useless for Flying

Why don't barnyard fowl fly? They can make a fluttering pretence at flight, it is true, but for real flying their wings are useless. Barnyard fowl have lost the use of their wings through neglecting to use them. They have been valued for their eggs, and, as a consequence, they have been well fed. Thus the necessity for flying from place to place in search of food has not existed. They have for the same reason been protected as far as possible from attack by animals and from other dangers that would make flight, as a means of escape, a necessity. In course of time, therefore, their wings have become practically useless for purposes of flight. The wings of barnyard fowl are gradually decreasing in size. It may be in the course of time their wings will be nothing more than mere stumps, and later still it is quite possible that they will disappear altogether.

When the weather is fine and the sea calm, seals frequently sleep floating upon their backs in the water.

IT CURES CATARRH BRONCHITIS

You don't have to wait for relief when you use Catarrhozone.

This wonderful inhaler treatment is guaranteed to cure any case of Catarrh, no matter how chronic.

You breathe through this inhaler and in so doing you send all through the breathing organs a powerful vapor that is full of soothing, healing, germ-destroying properties.

In this way the seeds of Catarrh are destroyed. Sore nostrils and weak throat are cured. Coughing, hard breathing, and sneezing all stop. For lasting cure use only Catarrhozone. Refuse a substitute. Two months' treatment (including the inhaler) price $1.00. Small size 50c, at all dealers, or The Catarrhozone Co., Kingston, Ont., Canada.

Canada's Need

Resources Only Need to be Developed in Order to Enrich This Country

"What is the need of Canada at the present time? We have a great debt in this country. How are we going to meet it? We are told to produce. We can produce in the factories, on the land, and in the mines of this country. We have great natural resources that only need to be developed in order to enrich this country; and if we can only develop those resources to the extent of one-fourth of their value at the present time we would have no trouble in meeting our obligations as a nation. There is no cause for any person in this country to be discouraged about the future of Canada. All we need to do is to move around this Dominion to realize the great resources we possess; and we cannot help but become prouder of our country and cannot help but glory in the fact that, in Canada, we have as great wealth and as great opportunities as are to be found in any land in the world today. What is requisite is to encourage the development of those resources, and, given an opportunity to the people to take advantage of the wealth that is in the country there will be no need for the government to worry about the future of Canada and no need for the honest, capable and ambitious citizen of Canada to worry about it either."—W. A. Buchanan, M.P., in the House of Commons.

I fell from a building and received what the doctor called a very bad sprained ankle, and told me I must not walk on it for three weeks. I got MINARD'S LINIMENT and in six days I was out to work again. I think it the best liniment made.

Pershing Receives Jewelled Sword

Sir Auckland Geddes Presents Gift From City of London

Great Britain does not forget those who prove themselves its friends in the hour of need. Sir Auckland Geddes, British ambassador to the United States, told General Pershing, in presenting him with a bejewelled sword as a gift from the city of London. The presentation was made at the British embassy.

Commenting on the celebration of the independence of the United States "arising from an autocratic government by the spirit of individual freedom astir in many lands," Sir Auckland recalled that in those days, "there were many on both sides of the Atlantic Ocean who thought the action of the framers of your constitution right.

"There is none now, I believe, on either side of the Atlantic," he said, "who does not think that they were right. Though neither you nor we are all of English stock, the memories of Runnymede are a possession of all your people as they are living memory and possession of all the British people."

General Pershing accepted the sword "in the name of the men of the United States who, with the men of Great Britain and the other allies, combined the courage and skill that brought a new victory to our race, and to all these who seek justice and liberty for mankind."

Minard's Liniment Relieves Distemper.

Farmers and Automobiles

Practically 50 perceut of all the motorcars built are sold to farmers. The sales of motor trucks to farmsr are fast reaching that high mark, for the trucks afford the means to save money, not only in transporting farm products to market and getting better prices, but in cutting down the farmer's overhead expenses.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants, may set up a trouble impossible to irradicate except through a sure preparation such as Dr. J. D. Kellog's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Swat the Rooster

Much Loss Is Incurred In Summer Months Through Placing Fertile Eggs on the Market

The presence of male birds in the flock during the summer months has a decidedly detrimental effect upon the quality of eggs and poultry producers lose many thousands of dollars annually through the presence of partially incubated and bad eggs in the produce they market. Reports are now being received from all parts of the country of the quantity of partially incubated eggs appearing in current receipts. Producers do not realize that it is unnecessary for a fertile egg to be placed under a broody hen to cause the germ to grow; a temperature of seventy degrees is sufficient to start incubation. If the heat is constant the development of the chick will continue, but if it ceases or is intermittent, putrefaction at once sets in, and the egg becomes bad. Such eggs have no place or value in shipments, and should they get to the consumer the consumptive demand immediately falls off.

The male bird is not essential in egg production, his usefulness is over when the supply of fertile eggs for the season has been secured. The hens will lay just as many eggs when the male bird has been removed and the eggs will be more suitable for consumption, packing or storing. Further, there is a distinct financial gain to the producer who markets infertile eggs, because the best trade in many cities offers a premium of from one to five cents a dozen for infertile eggs.

Then there is the question of feed. It costs money to feed poultry, and with feed at its present value, the consumption of feed by males kept for no particular purpose is a serious economic waste. The reason for this is that the best price for live and dressed fowl prevail in the spring and early summer. During the summer the price declines, and by the early fall when many producers decide to market their male birds a better price than prevailed in the spring has to be accepted, the producer thus losing the amount per pound the market has declined, plus the value of the feed consumed by the birds during the summer months. This financial loss takes on a more serious aspect when it is coupled with the amount charged back by the wholesaler for the bad and partially incubated eggs that have been marketed.

Farmers and others selling eggs for market should therefore need no urging to kill off, dispose of, or at least remove the male birds from the flock after the breeding season.

Clean

Diner. Is there any soup on the bill-of-fare?

Waiter. There was sir, but I wiped it off.

SUNDAY SCHOOL LESSON

LESSON FOR JULY 18

DAVID SPARES SAUL'S LIFE

I. Saul in Pursuit of David (vv. 1-3). Ever since David took his departure from Jonathan (ch. 20), when that crowning act of friendship was shown, Saul had been hunting him as a wild animal. He now pursues him with 3,000 chosen men. David flees from place to place, hiding as an outlaw. Sometimes he is in the enemies' country doing disreputable things. This is the period of his schooling which fitted him to be the eminent king that he was. It was a bitter period in his life, but God sent him to this school and adapted the instruction to suit his needs. David never could have been the broad man that he was, had he not been prepared in this crucible of bitter experience. His wading deeply into trouble adapted him to write psalms suited to all men, in all ages, and under all conditions. His life swung through the whole of human experience, touches the highest point of fame and dipping to the depths of sorrow and shame. Then, personally, he learned many lessons, among which may be mentioned:

1. His own weakness. It was necessary that he be humbled under the sense of his infirmities. Unless a man has learned this lesson, sudden elevation to power will utterly ruin him.

2. His dependence upon God. David's many miraculous escapes caused him to realize that the Lord had redeemed him out of his adversity. His hiding places in the rocks gave him much of his imagery for the psalms.

3. He learned the country and people over which he was to rule. By knowing the grievous afflictions which Saul had heaped upon the people he could sympathize and remove them.

4. He learned the magnanimity of self-control. This a man must know before he can be a true king. He that ruleth the spirit is better than he that taketh a city (Prov. 16:32).

II. Saul in David's Hands (vv. 4-20).

1. David sends out spies (v. 4). This he did to find out as to whether Saul was come in very deed.

2. David at Saul's camp (vv. 5-11). He took with him Ibishi and went in the night to where Saul was sleeping. Abishi asked to be allowed to kill Saul, but David forbade him because Saul was the Lord's anointed.

3. David takes Saul's spear and his cruse of water (vv. 12, 13). Once before at Engedi (ch. 24) David spared Saul's life. Now again he was at his mercy. This he did that he might show tangible evidence to the king that he had no evil intent.

4. David taunts Abner, the king's bodyguard (vv. 14-16.) He calls to Abner and taunts him for his listlessness—his failure to watch over the Lord's anointed, the evidence of which is the cruse and the spear in his hands.

5. David reasons with Saul (vv. 17-20). When Saul recognized David's voice, David began to reason with him, showing that he had nothing but good intentions towards the king. He asked that he would show what wrong he had done or what evil intent was in his heart. David is very humble and begs Saul to relent, for surely if he had any wicked purpose he would not have saved his life twice when the Lord had placed Saul wholly at his mercy. David had peculiar regard for the Lord's anointed. He recognized the fact that the Lord had delivered Saul into his hands not to kill, but to save.

III. Saul's Confession (vv. 21-25).

1. He confessed that he had sinned. The sad feature about his confession is that it lacked conviction, for he went right on sinning. This is the great trouble with people. They are willing to confess that they are sinners, but still go on sinning.

2. He confessed that he had played the fool and erred exceedingly. We see about us daily many using such expressions, but still they go on repeating their sins. David shows his magnanimity of spirit, however, in delivering the cruse and the spear to Saul's servant. He knew that Saul's confession was not genuine, so he was afraid to go near. He knew the cunning of that old fox. He still appeals to Saul's kindness to him, and they part never to meet again.

Sumatra Protects Tigers

Tigers are protected in Sumatra, the reason being that one of the important industries of that country is the cultivation of an African palm. This palm was introduced several years ago, and the wild hogs so enjoyed its easily obtained fruits and so thrived on them that they increased and multiplied rapidly until they became a perfect pest. Now, wild hogs are the favorite diet of Sumatran tigers, therefore the protection. But it looks like a dangerous experiment.

To Hold Court at Chesterfield Inlet

For the first time in Canadian history, court will be held at Chesterfield Inlet, when Ouangwak, alleged murderer of two kinsmen, will be tried. The Eskimo was brought to Winnipeg by Sergt. W. O. Douglas, of the Royal Canadian Mounted Police, who will take him to Chesterfield Inlet, sailing from Montreal.

Rain falls in torrents in the Sahara Desert at intervals of five, ten and twenty years.

Swiss Was Inventor Of Poison Gas

Proof Contained in Original Documents Dated April 1865

That a Swiss lieutenant 250 years ago invented asphyxiating gas for the French army, is the claim advanced by the French press supported by historic documents, proving that so far as war is concerned there really is nothing new under the sun.

The Ministry of Foreign Affairs contains the original documents dated April 1865, signed by Dupre, French Consul at Geneva, attributing the discovery to the Sieur Doraat of Ste Valais, then serving the French King at the Canton of Fribourg. According to Dorchat's claims, he was able in four hours at a minimum expense, to prepare a liquid giving off a gas so thick and of such disagreeable odor that it was impossible for human beings to remain in its proximity.

The gas bomb is no new invention, for Dorchat had perfected a method of throwing containers from a cannon, even exceeding modern gas artists by devising a cartridge or tube to be fired from an ordinary army pistol. The official records, however, fail to show whether the great Louis investigated Dorchat's discovery, but military experts of today point out that the letters were mentioned 14 years ago in a volume published by the Swiss Consul in Belgium and probably prompted German exponents of frightfulness to investigate the possibilities of adopting gas in warfare.

Qualified to Practice

Western Candidates Successfully Pass Medical Exams

Fourty-four candidates have successfully passed the examinations held by the board of examiners of the Medical Council of Canada in June, in Toronto, Winnipeg and Vancouver, and will be registered on the Canada Medical Register, according to an announcement by Dr. R. W. Powell, Ottawa, registrar, and Dr. R. Ferguson, London, chairman of the Board.

The 44 are now qualified to practise the profession of medicine. The names of the western men follow:

D. Black, Victoria, B. C.; D. F. Bustred, Rochester, Minn.; W. N. Campbell, Calgary, Alta.; C. D. Chown, Dubuc, Sask.; W. A. Dobson, Vancouver; M. S. Diver, Vancouver; F. D. Facey, Millet, Alta.; A. F. Gillis, Merritt, B.C.; J. E. Harvey, Kelowna, B.C.; E. A. Miller, Edmonton; W. Morris, Sceptre, Sask.; R. C. McCullough, Vancouver; A. L. McDonald, Sylvan Lake, Alta.; J. R. W. Nicholson, Winnipeg; F. R. Pollock, Victoria, B. C.; F. N. Rodin, Winnipeg; E. E. Rogers, Vancouver; P. P. Salmond, Regina; Margery Stauffer, Winnipeg; A. Upham, Miocene, B.C.; and E. R. Ziegler, Vancouver.

England to Grow Square Trees

Not with any desire of giving publicity to the designs of that curious class of artists, called cubists, but because the entire laudatory ambition of avoiding waste, the Cambridge Forestry Association, of Cambridge, England, suggests that trees should be made to grow square instead of round, thus producing wood of better quality and in greater quantity. Will the leaves, flowers and fruit of such trees be square also, one wonders?

Open Timber Exhibition

Canada Has Attractive Display At Kensington

Prince Arthur of Connaught, opened the Empire Timber Exhibition at Kensington, promoted by the governmental department of overseas trade with the object of bringing into more universal use the timber grown in the Empire.

The promoters give a special word of praise to the Canadian forestry laboratories at Montreal. Canada has a fairly extensive, and well staged exhibit, and a few Canadian firms have individual displays.

The exhibition is of a purely technical character, intended to attract traders. The official catalogue which contains a list of shippers, importers, etc., will doubtless prove useful to specialists in the timber industry.

B. C. Mining Industry Develops

Quesnel, B.C.—Announcement of a local firm that it is in the market for black sand concentrates and has arranged for the construction of a plant to remove valuable ore to the extent of 90 percent of the assays value is believed by many experts to mark a milestone in the development of the mining industry in this province. In British Columbia, it is said that there are millions of tons of black sand carrying values in gold and alloys of platinum which have hitherto been of little economic value because the precious metals could not be separated therefrom at a profit.

Holland is covered with willow trees, and the great dykes of the country are made stronger by the network formed by the roots.

Admits That Profits on Sugar Are Satisfactory

Ottawa.— That he had sold more sugar during the past year, had made a bigger profit on this commodity than ever before, and that he was entirely satisfied with the present restrictive regulations of the board of commerce, which he thought was quite fair, was the outspoken and most unexpected statement made by president B. G. Crabtree, of the Retail Grocers' Association at a conference between the newly constituted board of commerce and a delegation representing the different retail merchants held in the city.

Mr. Crabtree's remarks were in direct opposition to those of other members of the association. E. M. Trowhern, Dominion secretary of the Retail Merchants' Association of Canada, who headed the delegation, followed by J. C. Campbell, the district secretary, endeavored to show the members of the board that their action in fixing the sale price of sugar, had meant that the retail grocers were now compelled to sell it at a loss.

Russian Peace Needed

British Labor Delegation Declare the Continuation of Blockade— Is Madness

London.—The British Labor delegation which recently returned from Russia, has issued an interim report. It declares there is urgent need for immediate peace with Russia and that persistence in the policy of blockade and intervention is madness and criminal folly which can only end in European disaster.

Emphasizing Russia's economic and transport difficulties and the absorption of her efforts in military activities, the report says: "Ringed from the world by a blockade of all powerful nations, attacked by enemies from within and without, and menaced by fear of counter-revolutions, from within, is it wondered that a revolutionary government which has maintained any kind of order and discipline amongst its peoples, has rallied to its support practically the whole Russian nation."

Voice Across the Sea

Wireless Telephone to Join Newfoundland and England

St. Johns, Nfld.— Preparations are being made at the historic Signal Hill for establishment of communication between Newfoundland and Great Britain by wireless telephone. The feat of speaking across the Atlantic by wireless telephone has already been accomplished, connection having been established between London on the one side and Glace Bay, C.B., the Marconi headquarters, on the other. But in the present instance, it is planned to make the scheme much more extensive. The real purpose of the activities of the Marconi Company is to give a demonstration to the old world members of the press conference, who will shortly be out this way to join the Dominion members in Canada for a two months' tour of that country.

The object is to have the steamer Victorian, on which the press men are coming across, in constant communication with the land on either side from the day they leave Liverpool till they arrive in Halifax, and for this purpose a station is being equipped on the Cornwall coast in England, second at Cabot Tower, Signal Hill, St. John's, and the third on the Victorian.

Villa May Surrender

Mexican Rebel Has Signed Armistice And Agrees to Cease Making Trouble

El Paso, Tex.—A despatch to the El Paso Times from its correspondent in Torreon, Mexico, says Francisco Villa has signed an armistice and agreed to cease attacks on trains, garrisons or towns.

The rebel chieftain has also agreed to surrender, under certain conditions to be approved by Provisional President De La Huerta.

Burned at the Stake

Paris, Texas.—Irving and Herman, negroes, aged 19 and 28 years, and charged with having shot and killed their landlord, J. H. Hodges and his son, William Hodges, were burned at a stake here by a mob

Norris Government to "Carry On"

Winnipeg.—The Free Press bulletin says: "Definite decision to carry on the administration has been reached by the Norris government, according to information from an official source."

SINN FEIN COURT ORDERS SUPPRESSION OF ALL INFORMATION

Dublin.—The Dublin county court has instructed its officials not to supply any information to the British income tax authorities nor to allow these authorities to examine books or documents. "The Irish Republican Parliament" issued these instructions through the self-styled court.

The Sinn Fein executive in Cork has circulated among the Cork merchants a similar warning not to furnish income tax information, adding: "Any breach of this order will be severely dealt with."

The situation in the west and south is so serious owing to the stoppage of trains, that many towns are adopting a rationing system as a precaution.

Londonderry, Ireland.—An atmosphere filled with ominous forebodings prevails here. It will surprise no one if the civil warfare that terrorized this city for more than a week recently, broke into fresh flame at any moment. Nationalists, who in the recent struggle were finally forced to yield to the armed weight of the government troops, now seem all prepared for new war.

Sandbags and barbed-wire fences are being erected in the main thoroughfares.

Reported Pulp Merger

Montreal.—In many of the leading stockbrokers' offices there was a persistent report that a gigantic pulp and paper merger of several of the leading paper industries in Canada was being quietly consummated. It is understood that capitalization would be at least $100,000,000—if not more—and full details of the big undertaking are expected on the street before long.

Lord Fisher is Ill

London.—The Times says that it learns that Admiral Lord Fisher, former first sea lord, is seriously ill.

Good Crop Prospects Throughout Manitoba

Provincial Agricultural Department Issues Encouraging Report

Winnipeg.—On the whole the crop outlook in Manitoba is very encouraging, says an official report given out by the provincial department of agriculture. It is stated that reports from probably 50 percent of points are entirely satisfactory, while from others there is some word of lack of recent rains. There is no suggestion of crop failure, however, and indications run from "fair to good." Many early wheat fields are headed or heading. A fairly early harvest is expected. Grasshoppers have been successfully fought with poison, though they continue their work in some districts.

Resigns from Government

J. H. Burnham Says He Was Elected To Hold Office Under War Conditions Only

Peterboro.—J. H. Burnham, Unionist M. P. for West Peterboro, has resigned from the house of commons, his resignation having been forwarded to the speaker. In a letter to Hon. Arthur Meighen, the Premier-designate, Mr. Burnham declared that "the return to pre-war political conditions has been delayed at Ottawa, but cannot in honor be longer delayed by me."

Mr. Burnham explains that he was elected by members of different political parties in West Peterboro to form part of a government that had as its purpose the successful prosecution of the war, and that now that the war is over, he has no other choice than to hand back the trust that was handed to him in 1917.

Farmers Prepare for Election

Camrose, Alta.—W. T. Lucas, of Lougheed, was chosen to contest the federal seat of Victoria for the farmers at a convention of the U.F.A. and U.F.W.A., Political association of Victoria which was held here. Twelve nominations were made, Lucas being selected after five ballots were taken. L. W. Hutchison, of Camrose, was elected president, and Mrs. J. F. Ross, of Duhamel, and J. A. McDonald, of Lougheed, vice-presidents.

Help for Poland

Spa.—A member of the Polish delegation said that Marshal Foch and Field-Marshal Wilson were considering the question of military aid for Poland.

News of the Provinces

SASKATCHEWAN

Regina.—What is believed to be the most favorable crop report ever issued by the Department of Agriculture was given out last week. It comprises reports from 57 points representative of the whole province, and every locality testifies to the healthy state of the crops and the abundance of moisture.

Regina. —The city is considering with the United Hotel Company, the erection of a new hotel to cost $500,000. A committee of the Board of Trade has approved the proposals, and an effort is being made to raise the necessary capital.

Saskatoon.— The total number of big game animals shot under license in Saskatchewan in 1919 was 1,826 divided as follows:— Moose, 1,101; deer, 661; caribou, 64.

Swift Current.—Further work has been done in connection with the proposals to irrigate a portion of southwestern Saskatchewan embracing 125,000 acres. The irrigated district will now probably reach the Weyburn-Lethbridge line of the C. P. R. and take in country north of Consul, Vidora and Robsart.

ALBERTA

Edmonton. —Showers and general rainfall throughout the greater portion of the province during the past week has further assisted the growth of crops. Wheat in many localities is over 12 inches high, and timothy, alfalfa, and garden produce are making excellent progress.

Edmonton.—Since the beginning of the year Alberta government employment bureaus have placed over 20,000 men and women in positions. Last months, out of 6,141 applications from men and 1,796 from women, they were successful in placing 5,480 men and 1,635 women.

Calgary. — The Pope Lease, comprising one of the finest pieces of agricultural land in the province, and containing 15,000 acres will shortly be opened for soldier settlement. More than 100 applications have already been received and the parcels of land will be disposed of by ballot

Gleichen. — Hospitality after the true Western flavor will be accorded the British press men on their Canadian tour when they reach Alberta. Here the two special trains will be greeted by a band of 500 Blackfoot Indians in their native costumes, and paint and feathers. After a tour of the irrigated district, a stampede of western frontier sports will be staged. Typical western entertainments will likewise await them at Calgary and Banff.

MANITOBA

Winnipeg.—A sheaf of winter rye just cut with the mower was brought into the city by a farmer from Birdshill. It was fully headed out and in bloom, and measured 58 inches. This seed was sown in October last.

Brandon.—Great interest, even surpassing that of previous years has been evinced at the tour of the Better Farming Train, throughout the western provinces. The average daily attendance at exhibits, demonstrations and lectures, has been in excess of twelve hundred.

Niverville.— J. S. Laidlaw, who is growing hemp for the Canadian Fibre Products Company, incorporated with a capital of $1,000,000, has exhibited some fine samples of this year's production, and states that prospects of a good crop are excellent.

BRITISH COLUMBIA

Victoria. — Investigation will be commenced immediately with a view to establishing a steel plant in British Columbia, according to a statement made by the chairman of the board of directors of the Canadian Collieries, Ltd. He has just returned from Brazil, Paris, and London, and has been instructed by a number of steel and financial men to investigate the steel possibilities of the province.

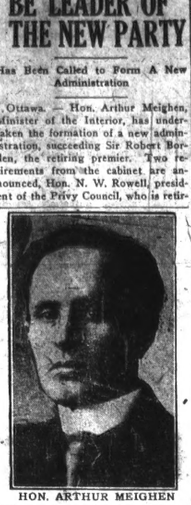

Vancouver.—The value of fish that were caught in British Columbia waters during the first three months of the year amounts to 1,320,888, leading all the provinces of the Dominion. This revenue was derived from 17 varieties of fish out of a total of 38 edible species that are found in quantities on the Pacific Coast.

Victoria.—The manufacture of calcium carbide at various points throughout the province is being advocated here. This material, which is manufactured from limestone and coke by subjection to heat in an electric furnace, is used for the production of acetylene gas, as a substitute for gasoline, and for certain chemical purposes. One ton of calcium carbide is obtained from 3,000 lbs. of the mixed material.

MEIGHEN WILL BE LEADER OF THE NEW PARTY

Has Been Called to Form A New Administration

Ottawa. — Hon. Arthur Meighen, Minister of the Interior, has undertaken the formation of a new administration, succeeding Sir Robert Borden, the retiring premier. Two retirements from the cabinet are announced, Hon. N. W. Rowell, president of the Privy Council, who is retiring to private practice, and Hon. Martin Burrell, Minister of Customs, who is to become librarian of parliament.

HON. ARTHUR MEIGHEN
Who has been called upon to form a new administration in the Dominion.

The two retirements, it is stated, are not due to the change in leadership. Mr. Burrell has for some time expressed a desire to return to private life. Mr. Rowell's resignation is based on the point that a new party being created, and an administration formed to represent that party, that he is entitled to ask "an honorable discharge."

So far as the remaining members of the cabinet are concerned, it was stated on high authority, they will give their "undivided support" to the new prime minister. In the formation of his cabinet, therefore, Mr. Meighen will have but two retirements to meet—Those of Mr. Rowell and Mr. Burrell, with the addition of that of Sir Robert, whose resignation with leave the Maritime provinces without a representative in the cabinet. Mr. Meighen himself possibly will assume the portfolio of president of the privy council, relinquished by Mr. Rowell, and in that event it is likely that the department of the interior, over which he now presides, will be merged with that of immigration and colonization. The vacancy caused by the resignation of Mr. Burrell, it is thought, is likely to be filled by the appointment either of R. F. Green, member from Kootenay, West, or of H. H. Stevens, Vancouver centre.

As a representative from Nova Scotia, the name of F. B. McCurdy, of Halifax, has been suggested. Should either of these latter appointments be made, a by-election would be necessary. Although all members of the cabinet technically resign when Sir Robert hands in his formal resignation they will not require to be re-elected on accepting office in the new administration.

Western residents of the city are jubilant over the fact that Hon. Mr. Meighen will be the first western man to take over the chief executive office of Canada. While he is a native of Ontario, Mr. Meighen has spent practically the whole of his life in the West. He has represented Portage-la Prairie, Man., since 1908. Mr. Meighen was also the man who went with Sir Robert Borden to England in 1917 to attend the imperial conference. He is a barrister by profession, having graduated from the Toronto University in 1892; he is also remembered as the man who fathered the compulsory Military Service Act and carried it through the house in 1917.

Against Alliance

China Opposed to Renewal of Japanese Pact

Shanghai. — Sir Belby F. Alston, British Minister to China, has reached this city on his way to England, having been given a leave of absence. He is taking with him a petition to the British government presented to him here by a score of leading Chinese student bodies, opposing a renewal of the Anglo-Japanese treaty.

The document says the conditions which led to the negotiating of the treaty no longer exist, and declares the danger from Russia and Germany has been removed. The United States, it asserts, is the only power with strength sufficient to endanger peace, and "it is unthinkable that that country would alter its established policy overnight."

Explosion in Powder Factory

Dijon, France.—A violent explosion occurred in a gunpowder factory at Youngres, near here. It is known that ten persons are dead and thirty badly injured.

Dipping in Mange Affected Areas

Ottawa Reports That Alberta and Saskatchewan Farmers Are Assisting in Work

Ottawa. — The first stage of the compulsory dipping order for cattle in mange affected areas in Southern Alberta and Southwestern Saskatchewan has been completed, according to word received from Dr. George Hilton, chief veterinary inspector of the Dominion, who is supervising the move by which the federal department of agriculture hopes to practically eliminate mange within the next six or eight weeks.

All cattle in the area designated were ordered to be dipped, and work started on June 24, the total number of vats used being 88. Within a few days, twelve more had been added. Dr. Hargraves, of Medicine Hat, who is assisting with the work, reported that practically every stock owner had given the department their fullest co-operation. Range riders engaged by the department covered the territory to see that stragglers were brought in behind the general roundups.

The second dip has commenced, and it is hoped to complete it by July 15, when statistics on the number of animals treated will be available.

Resignation of Premier Gouin

After Fifteen Years in Office, Feels That He Can Confide Work To Other Hands

Quebec.—At a cabinet meeting Sir Lomer Gouin tendered his formal resignation as premier of the province. No announcements have been made as in regard to his successor or other cabinet changes. The official statement of the retiring premier, in part, is as follows:

"During fifteen years I have had the signal honor of enjoying the most complete confidence of our people. I feel that I should now confide to other hands the work of peace, concord and prosperity, which the Liberal party has striven to accomplish in this province since 1897.

"Thanks to the harmony that reigns among all the groups of our population, and to their intelligent and effective collaboration, our province is developing rapidly, and already occupies a very enviable position in the Dominion. I have an unalterable faith in the great future that attends it.

"The ambition of my life has been to merit the confidence of my fellow citizens, and in taking leave of them as prime minister, to think that I have been worthy of that confidence."

Garnering U.S. Crop

100,000 Men Are Moving North Through the Wheat Belt

Washington. — A land army of 100,000 farm hands organized by the department of agriculture is moving northward across the western wheat belt harvesting the United States grain crop in better time than in many years, according to reports to the department.

For the first time in years farmers have not been handicapped through the labor shortage, Dr. Taylor, of the farm bureau said. A wage of $7 for a ten-hour day is being paid the harvesters.

Would Ban Hearst

Resolution to Boycott All Hearst Publications Carried by the Daughters of Empire

Toronto.—A resolution to boycott the Hearst publications and to take steps to encourage the support of all Canadian and British standard periodicals by the members of the Imperial Order of the Daughters of the Empire was passed at a meeting of the national executive of the Daughters of the Empire here. Endorsation was given a petition from the Calgary branch of the Canadian women's press club to the government to conserve the supply of pulp wood for newsprint in Canada.

Russia Anxious to Resume Trade

Copenhagen.—The Russian government has agreed to immediately recommence negotiations for a resumption of trade with the outside world on the basis laid down by the British government in the negotiations with M. Krassin, the Bolshevik minister of trade and commerce. A Russian delegation is leaving for England with this purpose in view.

Soldier Settlement Board

Ottawa.—Soldier Settlement Board loans passed the seventy million mark in June. Up to the 19th of the month there were 17,872 settlers' loans amounting to $70,555,434, approved. The loans were for the following purposes: Land purchase, $38,399,892; implements, $7,849,386; stock and equipment, $22,259,668; removal of encumbrances, $2,046,488.

Plague Apears in Texas

Austin, Texas.—Eight cases of Bubonic plague have developed here and the authorities have announced that necessary precautions have been taken.

Greek Forces Are Advancing On Constantinople

CROP HANDLING TO BE DISCUSSED AT CONFERENCE

Winnipeg.—The whole question of wheat trading in Canada, in view of the announcement of the opening of the United States grain exchanges on July 15, is under careful consideration by the council of the Winnipeg Grain Exchange, according to a statement of J. E. Bottered, president.

All branches of the grain and flour trades were being invited to send representatives to a conference with the executive committee of the Grain Exchange at an early date for the purpose of determining the conditions under which the machinery of the Grain Exchange could best be put at the service of the country for the handling of the 1920 wheat crop," said Mr. Bottered, "therefore the Winnipeg Grain Exchange is proceeding energetically with plans for the safe and efficient handling of the Canadian crop for which the prospects at present are so favorable."

Siberian Coast Held by Japan

No Possible Terminal is Left to the Russian Railways

Washington.—Possiet Bay, last of the first-rate harbors on the Asiatic coast north of Port Arthur remaining in possession of Russia, has passed into the hands of Japan, according to official advices received here, which reported occupation of the town by Japanese troops. The harbor of Possiet Bay, 75 miles southwest of Vladivostok and part of Russian Siberia, was considered for a time by Russia as the logical terminal of the trans-Siberian railroad in preference to Vladivostok on account of the excellent facilities offered by its natural position.

Possession of the bay, together with other ports occupied by the Japanese this year on the Asiatic coast, according to official advices, gives Japan not only all salt water terminals of the Manchurian and Siberian railways, but every possible future terminal.

Friendly Towards Canada

Governor Cox, Democratic Candidate For President, Writes A Cordial Letter

Sandusky, Ohio. — A letter from Governor James M. Cox, Democratic candidate for President to Sir James Aikins, lieutenant-governor of the province of Manitoba, the principal speaker at the session of the Ohio State Bar Association, at Cedar Point was read to the convention by President Bennett. The letter, dated July 5, reads as follows: "I cannot express to you my regrets that circumstances prevent my greeting you in person and speaking the welcome of our people in this commonwealth.

"I have long preached the doctrine of a better understanding between the English speaking governmentalities of the United States and Canada. In the affairs of civilization and more intimately of humane welfare our division is only governmental. In Ohio you will find a cordial feeling for you and your countrymen and an understanding of how you have suffered during the stress of war. Let us hope as our soldiers fought side by side, so shall the two great powers of this hemisphere support, in union and harmony, the ideals with which will guarantee a better and a happier world.

"I am with great respect,

"Most cordially yours,

"JAMES M. COX,

"Governor of Ohio."

Canadians Honored For Bravery

London.—The list of awards of the medal of the British Empire Order, just published, contains the names of the following Canadians: Charles Norman Barclay, Eva Grace Curtis Marshall, Emery Mcgaul, Reginald Moncrief, Gilbert Murray, George Paterson, Clare Sauve, all for conspicuous bravery at explosives factories in Canada.

$80,000,000 Company

Ottawa. — Prominent among the company incorporations in this week's Canadian Gazette is the Riordan company, with a capital stock fixed at $80,000,000. The Ptarmigan Lumber Company, B.C., is incorporated with a capitalization of $250,000.

Jamaica Will Borrow From Britain

Kingston, Jamaica.— The Jamaica government proposes to borrow in London $15,000,000 to make Kingston a port of call for vessels passing through the Panama Canal.

Athens.—Brussa, an important Asia Minor city, fifty-five miles southeast of Constantinople, has been occupied by Greek forces, according to reports reaching this city.

Mudania, Asia Minor.— Although the Greek army was reported near Brussa, advices received indicated that up to Wednesday the Greeks had not entered the city.

The 20-mile highway to Brussa was controlled by bands of Turkish Nationalists and railway service has been discontinued by the British, who occupied Mudania Wednesday afternoon. Several British bluejackets and 40 Nationalists were killed. Mudania's streets are deserted, shutters are drawn and shops are closed.

Vice-admiral Freemantle's flagship, Revenge, the British dreadnought Royal Sovereign, several destroyers and a seaplane are standing off shore prepared for action against Brussa should it become necessary.

Brussa is quiet. Most of the prominent Turks have fled. The Greek and Turkish committees are co-operating in policing the district.

Shipowners and Seamen Disagree

Clash Occurs in Genoa Convention —British Sailor Predicts Revolution

Genoa. — Representatives of the seamen and shipowners clashed at the international seamen's conference, when Cuthbert Law, representing the British Shipowners, presented an amendment providing that the eight-hour day and 48-hour week should be applied only when vessels are in port.

Mr. Law said: "The 48-hour week would mean destruction of the mercantile marine, which is the greatest asset of the British Empire, and raise thereon the black flag of discontent."

A representative of the British seamen naively replied asserting that shipowners had been the greatest exploiters and had gained millions during the war.

"If you do not treat seamen as they deserve, it is not a question of the black flag, but of the red flag of revolution," he declared. This was applauded by the seamen's delegates.

Salary Arrears for Civil Servants

Back Pay for Fifteen Months Will be Given in Two Weeks

Ottawa.—Back pay checks for fifteen months will be paid to civil servants in the next two weeks. The total amount, according to an announcement in the house of commons will be about $4,000,000, that being the estimated cost of ante dating the civil service classifications.

The individual amounts paid will be the difference between a civil servant's former salary and that awarded him by the classification schedules.

It is possible that two checks will be issued for each person, one covering the year from April 1, 1919, to April 1, 1920, and the other for April May and June, 1920.

About 45,000 checks will be sent out from the auditor-general's department.

Armistice With Russia

Bolshevik Minister May Accept The Principles Laid Down By Allies

London.—The text of a note sent by M. Tchitcherin, Russian Bolshevik minister, accepting the principles laid down in the "allied memorrandum transmitted July 1, by the British government to M. Krassin, as the basis of agreement between Russia and Great Britain," is given in a despatch to the Herald of Christiania. "The proposal will have to be considered as an armistice between Russia and Great Britain and shows the belief of expectation that the armistice will pave the way to definite settlement," says The Herald.

Canadian Beef on U. S. Market

New York.—High prices of beef in New York have attracted heavy shipments of Canadian fresh beef, the Evening World says in a special article dealing with the decline, compared with the prices a week ago. The arrival of these shipments from Canada, the newspaper says, have curtailed the practice of short shipping to New York and making the New York market a "price model" for the United States.

Press Delegates Delayed

Montreal.—Word has been received that the British delegates to the Imperial Press Conference, to be held at Ottawa in August, will be three days late in landing. The party, passengers on the Steamer Victorian, will now arrive at Sydney, N.S., and not at Halifax as formerly planned.

$3.25 per pair

A well made Cotton Serge pant white with black or green stripes Belt loops and cuffs.

$4.75 per pair

KENT—STEVENS

The home of Mr. and Mrs. George Vickers was the scene of a quiet but pretty wedding on Wednesday, June 30th, when two of Lacombe's most popular young people, Miss Kathleen Stevens and Mr. Charles Kent, were united in marriage.—The Rev. Stephen Irving, of Calgary, Alta., an old schoolmate of the bride, performed the ceremony in the presence of the immediate relatives and friends of the contracting parties. The wedding march was played by Miss Jessie Glass.

The bride wore a beautiful gown of ivory satin, with a net cap caught up with orange blossoms. She was attended by little Miss Grace Vickers, who acted as ring-bearer. After the ceremony, a dainty luncheon was served, and the happy couple left on the afternoon train for Vancouver and other points, amid showers of confetti and all the best wishes of their many friends.

KINLEY—TAYLOR

A very pretty wedding was solemnized on June 29th at the home of Mr. and Mrs. F. H. Taylor in Walta when promptly at 8 o'clock in the presence of a great many friends, their youngest daughter, Strausie Yona was united in marriage by Rev. Mr. Hollingsworth, to Robert C. Kinley, youngest son of Mr. and Mrs. Jas. Kinley, of the same district. The bride was charmingly gowned in white silk, while her bridesmaid, Miss Victoria Kinley, sister of the groom, looked lovely in a dress of pale green silk and silver lace. The groom wore the conventional blue, and Mr. John Taylor, brother of the bride, acted as best man. Miss Maude Booth played the wedding march. After the ceremony, a delicious luncheon was served.

Both the young people are highly respected and popular, as the many beautiful gifts will testify.

The happy couple left for Calgary on the morning of the 30th, where they will spend their honeymoon, and on their return will make their home on the groom's farm northwest of town.

LIQUOR EXPORT AND IMPORT TO CONTINUE

The appellate division of the supreme court have held that the legislation passed by the provincial government with regard to the import into and export out of Alberta of liquor is ultra vires of the powers of the local house.

The court divided equally after hearing the arguments presented by A. H. Clarke, K.C., for the attorney-general; G. A. Walker, K.C., for the Dominion Express Co., and A. A. McGillivray, K.C., for the Gold Seal Liquor Co., and the case was re-argued on Wednesday in Edmonton, before Hon. Mr. Justice Hyndman, who has handed down a decision agreeing with the finding of Justices Beck and Ives that the act is beyond the powers of the local house.

The decision of the court means that importation of liquor into the province will be continued as before the recent legislation. Hundreds of orders for points in British Columbia and Saskatchewan are in the hands of local wholesalers, and the next few days will doubtless be busy ones in this line.

FUTURE FARM PRODUCTS

In an address before the Standing Committee on Agriculture and Colonization in the House of Commons, Dr. Jas. W. Robertson made some interesting references to the future of prices in regard to farm products. The outlook from a farmer's viewpoint is encouraging.

In the belief of Dr. Robertson, the farmers of Canada, under all circumstances, during the next few years will have the best chance to make reasonable and even large profits. Sometimes appeals, he states, are made in the name of patriotism and altruism. At the present time the first appeal is one of self-interest. And while money is being made by the individual, benefit is being brought to the community and the nation, and needed and valuable service rendered to humanity. All three, "pulls," self-interest, patriotism and humane service, are in one direction. Consequently the farmers of Canada will not make any mistake in producing as much as they can of all the many good products. They are sure to be needed. The world's prices in the main will be determined by conditions and factors beyond our control.

While it is probable that there will be some reduction in the price of farm products during coming years, in his opinion it is not at all probable that the relative prices of farm products will come down in proportion to those of other articles and commodities. Before the war farmers were not receiving adequate remuneration for their labor, management and capital. Some indication of the probable order in which prices may fall may be obtained from an examination of the extent of the advance in price which have occurred since the war. Comparing the prices in August, 1914, with the prices in August, 1919, the advance in Canada in four large groups were as follows: Western grains, 160 per cent; hogs and products, 142 per cent; cattle and beef (from 1913), 96 per cent; dairy products, 108 per cent.

But our farmers, continues Dr. Robertson, may depend upon being able to obtain the higher prices which the world's markets will afford. Canadian farm products have a preference in the markets of Great Britain because of their known superior quality, and in other European markets they are sure of at least an equality in price with the products imported from any other country. We cannot expect more than that. Whether we produce more or less, that is the highest rate we can get, and any extra quantity produced in Canada, as the result of extra effort, cannot of itself be an appreciable factor in reducing the world prices. The more we produce the more money our farmers will receive, the more quickly our nation will recover from the losses of war, and the more will we help to bring good cheer to a world still reeling and scarcely yet conscious of the extent of the appalling losses and wastes of four years of destruction.

In making his forecast as to the future of the price of farm products, Dr. Robertson comes to his conclusions in that it will likely take at least two years, 1920 and 1921, for the production of breadstuffs to meet the world's requirements and leave over a moderate reserve as security against scarcity the following year; that it will be many years before the world's production of milk, butter and cheese can adequately meet the demand; and that several years must pass before the supplies of cattle and hog products can be sufficient to provide nutritious rations of an invigorating sort for the millions of people who require them for the hard labor to which they must apply themselves—and that with bodies which, in many cases, have been weakened by the incomplete diet and other stresses of war.

THE TARIFF

A thorough revision of the tariff with a view to the adoption of such reasonable measures as are necessary—(a), to assist in providing adequate revenues, (b) to stabilize legitimate industries, (c) to encourage the establishment of new industries essential to the economic development of the nation; (d) to develop to the fullest extent our natural resources, (e) to prevent the abuse of the tariff for the exploitation of our natural resources, and (f) to safeguard the interests of the Canadian people in the existing world struggle for commercial and industrial supremacy.

Apart from the question of revenue the tariff should have regard to the maintenance, stability and prosperity of Canadian enterprise in the development of all our natural resources in lands, forests, mines, fisheries—as well as our agricultural and manufacturing industries. Consideration must also be given to the importance of creating and maintaining conditions that will afford to Canadian industrial workers opportunities for steady and remunerative employment, and maintain proper and decent standards of living among our laboring population. It is undoubtedly in the true interests of Canada as a whole that Canadian workers should not be forced to seek in foreign countries employment and opportunity denied them at home by reason of the export of the natural resources, with which the dominion is so amply endowed.

For the purpose of encouraging the fullest development of our natural resources the tariff should be so adjusted as to permit machinery and the implements of production to be purchased at prices that will compare equitably with prices in other countries for similar articles. The revised tariff law should be so framed and administered as to effectively prevent any customs duty being used to facilitate the formation or maintenance of any combine, trust, association or agreement among manufacturers, dealers or producers for the purpose, at the expense of the general public, of restraining trade, preventing competition or unduly enhancing the selling price of any article of commerce.

TRADE PREFERENCE

The principle of trade preference between the different members of the British Commonwealth should be maintained and extended from time to time to such degree as may be found practicable and consistent with Canadian interests.

While a general revision of the Canadian tariff based upon the foregoing consideration is due, it must be recognised that, owing to the war, economic and commercial conditions the world round have been profoundly disturbed and that as a consequence it is neither practicable nor possible in the national or public interest to undertake such revision until a thorough inquiry is made to ascertain the essential facts upon which the tariff provisions must necessarily be based.

The maintenance and continued application of the principle of direct taxation with a view to increasing the national revenue derived from this source, should be so adjusted that the burden may be borne by those most capable of sustaining it. In devising methods of taxation and in fixing rates consideration must be given to the revenue necessities of provinces and municipalities and care must be exercised to avoid the creation of conditions that will discourage immigration or the investment in Canada of capital essential to our economic development.

Field Competition

All entries for the standing grain competition are required to be sent in to Secretary Welch at once.

IN POUND

At G. H. Kent's Pound, Lacombe, 2 black gelding, one with white spot in forehead, bad wire cut on hind leg, both about 6 yrs. old.

GOLD BONDS

The Province of Alberta Offers

¶ To those desiring a safe investment at a high rate of interest, a new Bond issue paying 6 p.c. interest.

¶ These are ten-year Gold Bonds dated May 1st. 1920, and Maturing May 1st, 1930, with interest coupons payable May 1st and November 1st.

¶ Bonds are in denominations of $100, $500, and $1,000.

¶ The General Revenue and all the assets of the Province are behind this investment.

¶Investors may purchase these Bonds direct from the Department of the Provincial Treasurer, without commission of any kind or unnecessary delay in delivery.

¶ This offering is intended chiefly for the benefit of the small investor, so that the industrious and thrifty be he laborer, artizan, farmer, or professional man, may invest his savings by mail.

¶ Remittances should be made by marked cheque, money order, or postal note.

These Bonds may also be obtained from any recognized Bond House in the Province of Alberta.
